Insight Summer 2021 Internship, 1/13/2021

About the INSIGHT Program:

The INSIGHT Summer Research Program is an NIH-funded, eight-week paid summer internship through the University of Washington at Harborview's Injury Prevention and Research Center (HIPRC). Students in our program are matched to clinical research projects and partner with a UW Medicine & Health Sciences Faculty. Students get to meet and learn from peers and health professionals from across the country, and also get to participate in clinical shadowing at Harborview, and social activities and tours, including the King County Medical Examiner's Office. Bringing together a diverse group of young people interested in health care and research allows HIPRC to create a unique and rich resource for students who seek to learn more about what they can accomplish in the field of injury and injury prevention. The INSIGHT Program offers a \$3,200 stipend to those accepted.

Below follows our website, where interested students can find the application portal and all the details of the program:

L&S Peer Advisor Positions, 1/15

Berkeley L&S Advising

Apply to be a L&S Peer Adviser!

**L&S is looking to hire Peer Advisers for
the 2021-2022 academic year!**

*Paid Position (\$16.07/hour or academic credit)

What Peers Do:

Peer Advisers assist all L&S students by providing academic advising information on college requirements, L&S policies and procedures, and campus referrals.

Requirements/Details:

- Have a cumulative UCB GPA of 3.0 or higher
- Have completed at least one semester at UC Berkeley as an L&S student
- Be willing and able to commit to the position for the Fall 2021- Spring 2022 academic year
- Paid employment contingent on residing in the United States
- Find application and further details at lsadvising.berkeley.edu

**Applications Due Friday,
January 15th, 2021**

The Data Incubator Fellowship, 2/5/2021

In today's world, we know how difficult it can be to attend a full-time data science fellowship program for 8 full weeks.

That's why we're proud to introduce our part-time fellowship program.

You'll get the same great training, instructors and career boost as our full-time program, but with more flexibility.

The part-time program:

- Lasts 20 weeks instead of 8
- Takes place on Monday and Thursday evenings from 7:00-9:30 p.m. ET, with office hours held each week
- Allows you to work full-time while advancing your data career
- Includes TDI data science certification
- Offers the same curriculum and career services as our full-time program

The new application for our Spring 2021 Fellowship Program opens on 12/6.

Select your preference for full-time or part-time in your application and take the option that's right for you.

Casa de Esperanza Internship Program, year-round apps

Casa de Esperanza, a non-profit in Houston, Texas, provides residential care to children birth through six who are in crisis due to abuse, neglect, or the effects of HIV. Care is provided in our neighborhood by our Hands of Hope interns. Our interns, most of whom are recent college graduates, join us for a year of service (a twelve-month full-time post-graduation internship). Applicants wishing to complete shorter internships are considered on a case by case basis. We

Internship and Volunteering Opportunities: Week of January 11, 2020

provide on-site housing (interns live with the children they are caring for) and interns join us from all over the United States to be part of our internship program.

Information about our internship may be found here:

<https://www.casahope.org/hands-of-hope-internship>

The application for our internship may be found here:

<https://www.casahope.org/application-part-one>

Interns in our program gain valuable experience that is relevant to a number of fields and future career goals while simultaneously making a meaningful difference in the lives of a vulnerable.

We will have groups joining us in January, June, and August of 2021.

Volunteer RA Position: Emotion, Health, and Psychophysiology Lab at UCSF

The Emotion, Health, and Psychophysiology Lab at UCSF is accepting applications for volunteer research assistant positions.

Our research focuses on embodiment -- how the mind influences the body, and the reciprocal, how bodily changes influence thoughts, emotions, and intentions. Research assistants working in the lab are exposed to a variety of studies at the intersection of social psychology, emotion, and psychophysiology. RAs learn how to conduct studies, collect physiological data, and edit and score autonomic data. Our RAs work at least 10-12 hours a week for two school semesters.

This volunteer opportunity is ideal for undergraduate students or recent graduates looking to gain research experience for graduate school or medical school. Please note that while we welcome international applicants, we cannot help with the visa process.

If you are interested in applying, please fill out this application form

(<https://forms.gle/b2qs7eP7kjZwyPfs9>).

Any questions can be directed to the lab manager, Julia Moore, at julia.moore2@ucsf.edu.

Pandemic Professors: Volunteer Tutors needed!

VOLUNTEER AS A TUTOR!

We envision a world with no barriers, where every child can have access to a quality education and pursue their dreams.

Pandemic Professors provides free online 1-on-1 tutoring to help students in underserved communities strengthen subject comprehension, build important skills and increase their academic confidence.

Give back while learning new leadership skills!

We have the perfect student match for you, plus resources and support to help you grow alongside your student.

Flexible schedule: tutor any day of the week, any time of day.

While tutoring any student can be a fun and flexible way to give back, we offer a unique opportunity to partner with families in underserved communities.

From the moment they met, it was a positive connection.

- Happy mom of a middle school student

I had never been a tutor before but the supportive community along with the many resources, have allowed me to create exciting lessons.
