Clinical Science Coordinator at Kaiser Permanente, Nov. 2020

EMPOWER Study
Clinical Research Coordinator Job Description
Kaiser Permanente Oakland Site

TITLE: Clinical Research Coordinator
Hiring Manager: Ann-Marie Marsh
Co-PIs: Eileen Kim, MD; Naomi Edelson, Psy.D.

DESCRIPTION OF POSITION: Kaiser Permanente Oakland, Dept of Pain Management, is seeking a Clinical Research Coordinator Associate (CRCA) to perform duties related to the coordination of a large multi-site clinical research study. The study, Comparative Effectiveness of Pain Cognitive Behavioral Therapy and Chronic Pain Self-Management within the Context of Opioid Reduction, is a patient-centered study that encourages patient interest and willingness to actively and collaboratively reduce opioid use and test two well-established behavioral intervention pain treatments.

The CRCA will coordinate moderately complex aspects of the clinical study and work under the direction of the co-site directors, principal investigator, and clinical research manager. Patients with any type of chronic pain may enroll, except for patients with active addiction or behavioral or safety concerns. Our project focuses on community outpatient settings, where most U.S. patients receive prescribed opioids. Our project is designed so that the results can be broadly applied to anywhere in the United States.

Additional information is located at the following website:

DUTIES INCLUDE:

- Serve as primary contact with research participants and regulatory agencies. Facilitate all matters related to patient recruitment—screening, enrolling and consenting.
- Determine eligibility of and gather consent from study participants according to protocol. Assist in developing recruitment strategies. The coordinator will serve as the study contact for all potential participants and for all enrolled participants throughout the duration of their participation in the study.
- Track class attendance for patients assigned to the behavioral treatment groups (for those assigned to either Cognitive Behavioral Therapy, pain-CBT, or Chronic Pain Self-Management, CPSMP). Coordinate scheduling and launching of new treatment cohorts for pain-CBT and
CPSMP, and ensuring that peer-leaders and psychologists are confirmed and back-up systems in place.

● Collect participant data and manage research project databases, develop flow sheets and other study related documents, and complete study documents/case report forms.
● Ensure compliance with research protocols, and review and audit case report forms for completion and accuracy with source documents. Prepare regulatory submissions, and ensure institutional Review Board renewals are completed. Ensure the local study procedures and operations are in compliance IRB and HIPAA, including modifications and continuing review documents.
● Interact with the research team regularly, ensuring patient safety and adherence to proper study conduct.
● Ensure essential documentation and recording of patient and research data in appropriate files per institutional and regulatory requirements.
● Participate in monitor visits and regulatory audits.

DESIRED START DATE: November 2020
FTE and schedule: 50% - 100% (negotiable, with work from home option if desired.)
POSITION DURATION: 2 years
Contact: Naomi.s.edelson@kp.org
Outpatient Clinic Operations & Research Associate,
12/1/2020

Position: Outpatient Clinic Operations and Research Associate
Portland DBT Institute, Inc., Portland, OR
Applications Due: December 1, 2020

Job Description: This position is ideal for highly motivated, academically outstanding, graduate school-bound post-baccalaureates because of the wide range of opportunities afforded by this job. Task performed by the Outpatient Clinic Operations and Research Associate will include a wide range of clinic activities across three domains: Operations, Research, and Clinical. This position reports directly to PDBTI’s Associate Director, Andrew White, PhD. Operations activities include: tracking clinician caseloads; overseeing administration of patient outcomes assessments; providing onboarding training and supervision for all new clinician employees; recruiting, screening, and managing other group co-leaders. Research activities include: aiding in writing and submitting human subjects applications; implementing clinic policies and procedures for conducting research; cleaning and analyzing data in preparation for presenting and publishing papers. The associate will have opportunities to serve as a co-author on presentations of data and publications. Clinical activities include: co-leading no fewer than three DBT skills training groups weekly and developing/overseeing a DBT skills training fidelity process applying best practices. The associate will learn DBT skills and know how to teach them with complex, multi-diagnostic patients by serving as a co-leader.

The ideal candidate will be: ambitious, highly motivated, tech-savvy, efficient problem-solver, and highly personable with a broad range of skills including: exceptional project management and organizational abilities, a strong writer, excellent communicator, and a fan of details. Because a central responsibility will involve care and oversight of our research participants who are clinic clients and co-leading DBT groups, we are particularly interested in individuals with a natural talent in forming strong professional relationships based on genuine regard, warmth, and competence.

Other responsibilities will include:
- Conducting literature searches and extracting key content
- Establishing and maintaining strong relationships with clinician and patient research participants
- Oversee conduct of clinic wide efforts to gather outcome measures, track compliance, and facilitate data completion by clinicians and patients.
- Aid clinic leaders in developing research infrastructure
- Aid in data cleaning, data analyses, and writing up research findings.
- Developing study materials and protocols
- Creating and maintaining databases

Essential Qualifications:
- Friendly, personable, and approachable
- Excellent communication skills, in person, writing, and via email
- Highly detail oriented, organized and thorough
- Comfortable making phone calls
- Tech savvy; not intimidated by learning new technology
- Active problem-solver and independent worker
- Background, or interest, in health or mental health
- Effective in an unstructured environment; a self-starter who doesn’t require supervision and oversight
- Able to juggle many balls (metaphorically, of course) at one time
- Enthusiastic team-member who thrives in tight-knit environment
- Research experience
About Us: Portland DBT Institute (PDBTI) is located in the heart of Portland, Oregon. We are a free-standing, outpatient clinic and training institute that serves both public and private sectors. We are an interdisciplinary team that places high value on ongoing professional development, providing quality evidence-based service to clients of all backgrounds, and creating a supportive and egalitarian environment in which to work. We offer comprehensive outpatient DBT, DBT Intensive Outpatient Treatment for Eating Disorders. In addition to a wide range of clinical services, PDBTI provides training, consultation, and supervision in DBT regionally and throughout the United States. A robust in-house training program is available to all PDBTI staff to further enhance mastery of DBT and CBT.

PDBTI provides a full array of DBT services for adults, young adults and teens. Specialty programs include: DBT for Eating Disorders, DBT for Substance Abusers, DBT for PTSD and BPD. We also offer medication management services and provide a number of services designed to treat environments (e.g., Family & Friends Orientation Workshop, DBT-influenced couples and family therapy). We are a state licensed clinic and comply with all state requirements related to quality assurance and consumer protection. We are certified by the DBT-Linehan Board of Certification. For more information about our program, please see our website at www.pdbti.org. We are eager to develop a successful research mentoring program for post-baccalaureate undergraduates seeking highly competitive PhD programs in clinical psychology or social work.

Applicants
Candidates will be required to live in the Portland, OR area and commute to our offices post-Covid. Starting salary is $40,000. Position is full time with benefits. Please send letter of interest, unofficial transcript, three references whom we may contact, and your CV/resume to ndunn@pdbti.org.

Deadline and Start Date
Applications are due no later than December 1, 2020.
UC Davis TCAN Lab Research Assistant Position, 12/21

Dr. Cameron Carter's Translational Cognitive and Affective Neuroscience (TCAN) laboratory at the University of California, Davis invites applications for qualified candidates to fill an available Junior Specialist (research assistant) position for the "Effects of PFC tDCS on Cognitive Control, Attention Lapses, and Coordinated Neural Activity in the Theta and Alpha Bands" (tDCS) study at the UC Davis Medical Center. Our research focuses primarily on studying the neural mechanisms of cognitive dysfunction in psychotic illness. The goal of this study is to use a non-invasive brain stimulation technique, transcranial direct current stimulation (tDCS), to test a theoretical model in which attention lapses are regulated by the suite of cognitive control functions mediated by the prefrontal cortex (PFC). tDCS will be used in combination with electrophysiology (EEG) and magnetic resonance imaging (fMRI) methods to examine stimulation-induced changes in neural activity related to cognitive control in healthy adults. The incumbent will gain experience using technical, clinical, and study coordination skills.

For more information about the lab, please visit https://carterlab.ucdavis.edu/front/index.php. Please complete the application at https://recruit.ucdavis.edu/JPF03889. Applications can only be accepted via the UC Davis Recruit website. Positions have a one-year appointment with an additional year based on performance, and we strongly consider applicants who are able to consider a two-year commitment. For full consideration, applicants must apply by midnight on December 9, 2020. For any additional questions about the position, please contact Alesia Richardson (aarichardson@ucdavis.edu).

Govern For America, 12/21

Govern For America is searching for the next generation of public sector leaders to address our nation’s biggest challenges. We recruit, train, inspire, and empower recent graduates to dismantle systemic inequities, build more inclusive public systems, and create a more effective government. As a Fellow, you'll work in government on strategic priorities and innovative projects and bring your skills to bear on the most pressing challenges facing our communities. Govern For America Fellows work at the intersection of policy and practice in a fast-moving environment where new challenges and experiences are the norm. Whether you’re combatting the COVID-19 pandemic, working to end mass incarceration, or expanding access to high-quality pre-K, government is where we see leadership in action. The GFA Fellowship is your opportunity to tackle one of the biggest challenges of our time. The deadline is December 21st, apply [here](#).

**Posit Science Clinical Research Coordinator**

Clinical Research Coordinator  
Posit Science (BrainHQ)  
Full-Time Employee, San Francisco

**About Us**
Posit Science provides brain training exercises that are built with the power of brain plasticity – the ability of the brain to change itself throughout life. Our flagship program is BrainHQ, a mobile and web-based brain training program that is clinically proven to improve cognitive performance and help people be at their best throughout their lives. We’re deeply committed to science – we were the first brain training company to run clinical trials to show that our program worked, and as a result we are the first brain training company to work with national distribution partners, including libraries, auto insurers, and health insurers. Our users tell us every week that our programs change their lives for the better.

**What We’re Looking For**
Posit Science is seeking an in-house, full-time Clinical Research Coordinator to help oversee and coordinate clinical trials. The requirements of the position include the following: implementing study protocols; coordinating with study sites; maintaining regulatory, IRB and study-related documents; data monitoring in electronic data capture system; providing study and technical support to study sites and participants; and assuring compliance of standard operating procedures and policies to inclue ethical guidelines and regulations for human subjects research. We’re looking for people who:

- Have 1 to 2 years of experience managing research trials  
- Have experience working with study sites and institutional review boards (IRBs).  
- Have experience with electronic data capture systems such as RedCap, RedCap Cloud or similar.  
- Are self-motivated and have the interest and ability to thrive in a small company environment  
- Are skilled problem solvers who want to gain knowledge and develop new skills  
- Are eligible to work in the US without sponsorship  
- Have the ability to work on-site in downtown San Francisco following the present period of remote work

Experience with
- working in an agile clinical trials team
Work Opportunities – Week of November 16, 2020

- Google suite and Microsoft Office programs
- Programming or scripting languages such as Python is a plus (but not required).

Where We Work
Our office is in downtown San Francisco, near the Embarcadero Muni/BART stop.

What We Offer
Posit Science is a great place to learn and grow. We offer
- A competitive salary
- Medical, dental, and vision benefits for you (and your family members)
- Four weeks of annual paid time off
- A balanced approach to work
- Opportunities to grow your skills and take on new challenges
- Meaningful work that helps people live better lives

Come Work with Us
Interesting? Email us at jobs@positscience.com, tell us a bit about yourself in the email, and attach your resume. Please mention “Clinical Research Coordinator” in your subject line, so we know what job you are applying for. At Posit Science, we know that everyone’s brain is different, as a result of the life they’ve led, and we value all kinds of brains and all kinds of people. Everyone is welcome to apply.
Paid Research Data Analyst UCSF

**Position Title:** Research Data Analysist

**Contact:** Please send a cover letter and CV/Resume to Dr. Linda Chao at: linda.chao@ucsf.edu

**Hours:** Full-time with benefits as a Federal employee

**Position Definition:**
The Research Data Analysist will join a team of scientists utilizing MRI to study aging and neurodegenerative disease at the Center of Imaging of Neurodegenerative diseases located at the San Francisco Veterans Affairs Medical Center. The incumbent will conduct research collecting, processing, and analyzing imaging data on a variety of research studies, primarily for Gulf War and Dementia studies. Additionally, the individual will also be responsible for record keeping, maintenance, and general lab organization. The position will be under direct supervision from the PI, Linda Chao Ph.D., and will be provided training to acquire skills and knowledge of professional concepts in research data analysis.

**Major Duties and Responsibilities:**
- Acquire and analyze magnetic resonance imaging (MRI) data from research participants
- Conduct pre-procedural interviews of each research participant to determine if the subject has a contraindication for the MRI study
- Explain the MRI exam to the study participant so that the participant understands what is to be done as well as what hazards, if any, are possible.
- Perform data quality checks of all imaging data.
- Archive and back-up all imaging data, implement data quality control procedures as needed.
- Work with study team to develop new procedures when deemed necessary.
- Process brain imaging data, using a variety of in-house software

**Job Requirements:**
- Bachelor's degree in related area and / or equivalent experience / training
- Computer literacy with full working knowledge of MS Word, Excel, Access, and the Internet
- Acquiring knowledge of research function. Acquiring ability to perform research analysis duties
- Ability to effectively manage time, multiple projects, tasks, priorities and see assigned parts of projects through to completion on deadline
- Basic consultation and communication skills: verbal and written
- Self-motivated for a fast-paced learning environment
- Ability to exercise tact and discretion in handling a variety of confidential material
- Must commit to at least a year

**Preferred Qualifications:**
- Knowledge of brain anatomy and function
- Knowledge and use of MRI
- Knowledge of statistical analysis techniques and programs
Work Opportunities – Week of November 16, 2020

- Previous research experience in field of Neuroscience, Biology, or Psychology

University of Pittsburgh Full-Time Research Specialist

Candidates are being considered for a full-time Research Specialist position at the University of Pittsburgh School of Medicine with Dr. Rachel Vaughn-Coaxum in the Department of Psychiatry. This position is to support two research studies investigating effects of childhood adversity exposure on psychotherapy processes for depression in adolescents, funded by the NIMH and the Klingenstein Third Generation Foundation. The start date for the position is Fall 2020. Review of applications will begin immediately and will continue until the position has been filled. Please direct questions or additional inquiries to Dr. Vaughn-Coaxum (coaxumra@upmc.edu).

For more information and to access the application portal, please see the position posting: https://careers.upmc.com/jobs/5625658-research-specialist.

Brief Description of Duties: The responsibilities of the Research Specialist will include but are not limited to coordinating recruitment efforts; organizing and overseeing data collection; assisting in the development and management of study protocols; conducting clinical interviews and study assessments; assisting with mentorship of students working on the projects; maintaining and revising IRB protocols and other research compliance reports; management, cleaning, and preparation of data collected via online survey platforms, psychophysiological assessment, and behavioral tasks.

Required Qualifications: Bachelor’s degree in Psychology or a related field. Minimum one year of prior research experience (including experience as a student). Proficiency in word processing and Excel.
Preferred Qualifications: Experience working in a psychology, psychiatry, or other clinical science lab. Experience working with children and/or adolescents in mental health services or research settings. Experience with data management and use of software programs for statistical analysis.

The successful candidate will have excellent interpersonal skills; demonstrate strong organizational and time-management skills with excellent attention to detail; have proficiency in managing multiple tasks and working independently as well as with a team; and preferably have experience interfacing with children and/or adolescents and parents in a clinical research setting. The Research Specialist will be provided with training in clinical assessment and behavioral treatment methodology and will gain experience in research administration procedures and the preparation of manuscripts or grants. Additional independent research opportunities will be available based on interest and
suitability. This position is well-suited for individuals interested in pursuing graduate study in clinical psychology or related programs.

Research Assistant Position at MIDAS Project

Research Assistant Position Available
Rhode Island Hospital Partial Hospitalization Program and MIDAS Project

The Rhode Island Methods to Improve Diagnostic Assessment and Services (MIDAS) project is looking to hire a research assistant (RA), with a potential start date of May/June 2021. Candidates should be a recent or upcoming college graduate with a psychology or neuroscience major and an interest in going to graduate or medical school. In the Rhode Island Hospital outpatient psychiatry and partial hospital practices, we have integrated research assessments into clinical practice. The MIDAS project is one of the largest clinical epidemiological studies using semi-structured diagnostic interviews ever conducted, and we have published more than 350 papers from our database. The RA will be trained in conducting diagnostic interviews and writing clinical reports. The RA will also be responsible for managing databases and entering data, submitting IRB applications, recruiting participants, and conducting other tasks associated with various ongoing assessment and treatment research projects in the outpatient and partial hospital practices. Opportunities are available (and encouraged) for presenting research at national meetings and writing manuscripts for publication. Prior research assistants have published papers as first authors and have been successful at getting into top level graduate and medical schools.

Please send applications (cover letter and CV) to Mark Zimmerman, MD at mzimmerman@lifespan.org

Harvard Lab Research Manager or Research Assistant

We are hiring for two positions (below) - please pass along to any strong candidates who may be interested. For the Lab/Research Manager position – I am looking for a long-term person (not a 2 year post-bac) to help manage projects and related research processes in our Lab (masters or PhD level desired but not required).
Harvard Psychology Lab/Research Manager
Harvard Psychology Research Assistant
Dear Colleagues,

I wanted to share that I am currently hiring for 2 positions: a research coordinator and a postdoctoral fellow at the San Francisco VA/UCSF for research studies on PTSD, insomnia, psychophysiology, and women's health.

The research coordinator position would be a good fit for a recent undergraduate or current or recent graduate student looking for additional research and/or assessment experience with a Veteran population.

Research Coordinator position: https://recruiting.ultipro.com/NOR1032NCIRE/JobBoard/82cac330-9aa5-417d-9b64-56d383f4ea0/OpportunityDetail?opportunityId=863408b3-109e-43b4-a05e-173edd5c387

I am also seeking candidates with a Ph.D. in clinical psychology, neuroscience, or related fields for a two-year advanced postdoctoral fellowship in women’s health. The ideal fellowship candidate will an interest in women’s health and expertise in areas such as PTSD, psychophysiology, sleep, eating disorders, infertility and ovarian aging, and cardiovascular disease. The candidate will have opportunities to analyze pre-collected data and disseminate findings, design new research projects and contribute to ongoing studies.

Postdoctoral Fellowship https://psych.ucsf.edu/research/fellowships/women

I would appreciate it if you could please spread the word amongst your trainees.

Thanks so much,

Sabra Inslicht, Ph.D.
Staff Psychologist, San Francisco VA Health Care System
Associate Professor, University of California, San Francisco
Work Opportunities – Week of November 16, 2020
