Lab Manager, Georgetown Laboratory for Relational Cognition

The Georgetown Laboratory for Relational Cognition, directed by Dr. Adam Green, anticipates hiring a full-time lab manager to coordinate and conduct research on learning, reasoning, and creativity in high school students and young adults. The lab manager will contribute to ongoing large-scale grant funded projects and help in development of new projects. The preferred start date is early-June 2020. For more information on the lab, see cng.georgetown.edu.

Primary Responsibilities:
- Collection of brain-imaging data (primarily fMRI), as well as behavioral and survey data
- Recruitment of study participants
- Coordination of lab members to conduct ongoing projects
- Organization of professional and informal lab activities
- Administration of grant budgets for multiple ongoing and developing projects
- Many other duties as needed and depending on interest/motivation, including direct involvement with planning research projects and analysis of collected data

Required Skills and Qualifications:
- Bachelor’s degree
- One or more years of undergraduate or post-graduate research experience, ideally in the biological or psychological sciences
- Willingness to learn new skills and enthusiastically take on new projects and responsibilities
- Attention to detail, high level of self-motivation, and strong interpersonal and organizational skills
- Strong computer skills

Preferred Skills and Qualifications:
- Experience gathering and analyzing fMRI data
- One or more years of leadership experience
- Programming experience (e.g., E-Prime, MATLAB, Python)

To apply for this position:
Applicants should send a cover letter describing relevant experience and career goals, a current resume/CV, an unofficial college transcript, and contact information for two or more people who can readily comment on the applicant’s qualifications to cnlab@georgetown.edu. Please address any questions to Griffin Colaiuzzi at gc815@georgetown.edu.

Georgetown University is an Equal Opportunity/Affirmative Action Employer and all qualified applicants will receive consideration without regard to race, color, religion, sex, national origin, disability status, protected veteran status, or any other characteristic protected by law. If you are a qualified individual with a disability and need a reasonable accommodation for any part of the application and hiring process, please see the Georgetown website for more information, or contact the Office of Institutional Diversity, Equity & Affirmative Action (IDEAA) at (202) 687-
Work Opportunities – Week of December 16, 2019

4798. This position requires a criminal background check performed by Human Resources. Compensation is based on Georgetown pay scales, depending on qualifications and experience.

➢ Junior Specialist (Research Assistant) Position at UC Davis

The Translational Cognitive and Affective Neuroscience laboratory (PI: Dr. Cameron Carter), is recruiting for a Junior Specialist (research assistant) position at the UC Davis Medical Center. Our research focuses primarily on studying the neural mechanisms of cognitive dysfunction in psychotic disorders with additional interests in neuroimmune models of psychosis and mental health services research.

Applications can only be accepted via the UC Davis Recruit website. You can only be considered for the positions for which you apply, so please read the detailed descriptions available via each link. Positions have a one year appointment with an additional year based on performance, and we strongly consider applicants who are able to consider a two year commitment.

For any additional questions about the positions, please contact Vanessa Zarubin (vazarubin@ucdavis.edu).

ROCS Study Junior Specialist (1 position open)

Broadly, the Translational Cognitive and Affective (TCAN) Laboratory studies the neural mechanisms of cognitive dysfunction in psychotic illness. This position is to serve as a technical study coordinator for the “Effects of DLPFC tDCS on Cognition, Oscillations and GABA Levels in Schizophrenia” project at UC Davis Medical Center under Dr. Cameron Carter. The goal of the proposed research is to use a non-invasive brain stimulation technique, transcranial direct current stimulation (tDCS) to test a systems-neuroscience model of cognitive control deficits in schizophrenia. Specifically, we will use tDCS in combination with electrophysiology (EEG) and magnetic resonance spectroscopy (MRS) methods to examine stimulation-induced changes in neural activity related to cognitive control in schizophrenia.

The incumbent will coordinate many aspects of the research study. The incumbent will conduct tDCS, EEG and MRS experiment sessions. This will require the incumbent to consent study participants, schedule research appointments, and monitor progress through the study procedures. The incumbent will use a variety of in-house and commercially available software to process the data, and will receive training on analysis pipelines for collected data. The incumbent will also assist in recruiting research participants and conducting clinical interviews for research purposes under the supervision of a faculty member. The incumbent will manage study IRB protocols, adhering strictly to privacy and confidentiality laws. The incumbent will also manage data collection and organization, including mentoring undergraduate volunteers in the input of data to multiple databases. Furthermore, the incumbent will be expected to actively participate in weekly lab meetings, journal club presentations, presentations from outside speakers, and weekly workshops to help research assistants in the lab to develop their career goals. Depending on their contribution and role in the lab the incumbent may have the opportunity to contribute to writing and review of relevant manuscripts. Furthermore, the incumbent may have the opportunity to
Work Opportunities – Week of December 16, 2019

creatively contribute to the research project by proposing alternative analysis strategies, generate novel projects with existing data, review literature for manuscript preparation, and the ability to submit data for presentation at relevant conferences, such as Society of Biological Psychiatry or Society for Neuroscience (if funding is available). The incumbent will be actively and significantly involved in publishable research activities, including reviewing journal articles and engaging in discussions on research and the interpretation of research results with the PI and others in the lab. The incumbent will also participate in one or more of the following activities: appropriate professional/technical societies or groups, such as our weekly career development group and other educational and research organizations; and review research proposals, journal manuscripts, and publications related to area of expertise. The ideal candidate will have strong interpersonal, communication, and decision-making skills, as well as the ability to work well independently and as part of a team. Previous experience with data collection and processing, particularly with MATLAB, tDCS, EEG and/or MRS, is desirable.

To apply, please visit the following page: https://recruit.ucdavis.edu/JPF03194

➢ Part-Time Opportunity with Mental Health Accelerator

Ignite Mental Health is a non-profit mental health accelerator and mobilizer incubated by the Harvard Innovation Labs Venture Incubation Program which is working towards accelerating solutions in mental health focused on university and high school campuses throughout the United States.

They have reached out and mentioned it may be of interest to share with our members. They have several openings for part-time on-campus (<10 hours per month) term positions such as ‘Social Impact & Advocacy College Campus Lead‘, ‘Political Advocacy Campus Ambassador’ & ‘Marketing/Communications & Advocacy Campus Ambassador’ which you can learn more information about on www.Igntemh.org/campus-openings

They’re accepting applications (takes less than 3 minutes to complete) over the next 4 days with start dates throughout October/November for well suited candidates.

➢ NIMH Intramural Research Training Award Position
Work Opportunities – Week of December 16, 2019

NiMH Intramural Research Training Award Position

The Section on Mood Dysregulation and Neuroscience (SMDN), Section on Development and Affective Neuroscience (SDAN), and Neuroscience and Novel Therapeutics Unit (NNT) of the National Institute of Mental Health (NIMH) in Bethesda, Maryland, seek qualified individuals to fill Postbaccalaureate IRTA (Intramural Research Training Award) positions, with employment starting May through July 2020.

SMDN, SDAN, and NNT conduct research on the brain mechanisms of mental illness in youth, with a focus on irritability and anxiety. We also investigate treatments, such as cognitive-behavioral therapy.

These full-time research assistant positions require a bachelor’s degree and U.S. citizenship or permanent resident status (resident alien). A minimum commitment of 1 year is expected; however, a 2-year commitment is strongly preferred. Responsibilities include assistance with and participation in all aspects of the research enterprise: patient and healthy volunteer screening, recruitment, and training on research tasks; protocol implementation; data collection, entry, and analysis; and manuscript preparation. This work involves using statistical and graphics software to examine behavioral and neuroimaging data, preparing blood samples, and researching scientific literature. In addition, the position involves regular patient contact during outpatient testing and treatment visits. Research assistants also observe diagnostic interviews with patients.

Research assistants work as part of a multidisciplinary research team including physicians, psychologists, clinical social workers, and psychiatric nurses at the nation’s largest medical research center, the NIH in Bethesda, Maryland.

Successful applicants will be awarded Postbaccalaureate Intramural Research Training Award (IRTA) Fellowships, which provide opportunities for recent college graduates to spend time engaged in biomedical investigation. During their tenure in the program, post-baccalaureate fellows are also expected to initiate the application process for graduate or medical school.

Interested individuals should complete the online application found at the following website (link can be found under “Application Procedures”):

https://www.training.nih.gov programas/postbac_irta

Following completion of the online application, individuals should forward a letter of interest and resume to:

Emily Jones, B.A.
National Institute of Mental Health
National Institutes of Health
Department of Health and Human Services
emily.jones@nih.gov
301-492-5223

DHHS and NIH are Equal Opportunity Employers

➢ Research Assistant Position at NIH, Deadline 1/15/20

Mood, Brain & Development Unit, National Institute of Mental Health

Are you interested in neuroscience research and working with children/adolescents?

The Mood, Brain and Development Unit (MBDU) is seeking qualified applicants for a two-year, paid Intramural Research Training Award (IRTA) Fellowship, with employment starting in June 2020. IRTAs are part of a multidisciplinary research team of physicians, psychologists, clinical social workers, and psychiatric nurses at the nation’s largest medical research center, the National Institutes of Health in Bethesda, Maryland.
Within the Emotion and Development Branch of the NIMH, the Mood, Brain and Development Unit is led by principal investigator Argyris Stringaris, MD PhD, and conducts research using fMRI and MEG data to study the pathophysiology, treatment, and prevention of childhood-onset mental illness. Our studies are on the cutting edge of longitudinal research studying children and adolescents with major depression.

As a research assistant with MBDU you will gain experience working with patients in inpatient and outpatient settings. You will be involved in all aspects of the research process including observing diagnostic interviews with patients, administering standard psychometric measures, training subjects to participate in neuroimaging, and analyzing neuroimaging data. Duties and responsibilities include patient and healthy volunteer screening and recruitment; protocol implementation; data collection, entry, and analysis; and manuscript preparation. This work involves using statistical and graphics programs and researching scientific literature.

Successful applicants will be awarded post-baccalaureate IRTA Fellowships, which provide opportunities for recent college graduates to engage in biomedical investigation. The full-time, two-year position requires a bachelor’s degree and a U.S. citizenship or permanent resident status (resident alien). Post-baccalaureate fellows are also expected to initiate the application process for graduate or medical school. DHHS and NIH are Equal Opportunity Employers.

Please complete the MBDU application found at the following website no later than midnight December 15, 2019. Please note we are accepting applications on a rolling basis: 
https://forms.gle/E3VcWobJYQfwEro76

Please forward an updated resume and unofficial transcript to:
Lisa Gorham, lisa.gorham@nih.gov, (301) 480-8117
Please complete the universal NIH IRTA application no later than January 15, 2020: 
https://www.training.nih.gov/programs/postbac_irta

Research Positions in Neurodevelopmental Disorders Available for New Graduates

FULL-TIME RESEARCH POSITIONS AVAILABLE FOR NEW GRADUATES in the NEUROBEHAVIORAL & NEUROSCIENCE RESEARCH GROUP

The goal of the Neurobehavioral and Neuroscience Research Group at Cincinnati Children’s Hospital Medical Center in Cincinnati, OH is to advance the field of knowledge of the causes and treatment of autism spectrum disorders (ASD) and related developmental disabilities by spanning laboratory based scientific investigation, human biomarker development, and clinical research and treatment in affected populations. Our long-term goal is to advance personalized treatment approaches and successful outcomes for children and adults with
developmental disabilities. To this end, we develop and participate in projects focused on novel approaches to the treatment of social and communication impairments in children with autism, Fragile X Syndrome (FXS), and Angelman Syndrome (AS). Our current quantitative outcome measure development is focused on electrophysiology (EEG), imaging (MRI and near infrared spectroscopy), expressive language sampling, use of a new social preference eye tracking procedure, and quantifying cortical plasticity using transcranial magnetic stimulation (TMS). In our translational neuroscience lab, we use human induced pluripotent stem cells, several mouse models of autism, FXS, and AS, as well as patient blood/saliva samples to better understand the pathophysiology of these disorders and to identify potential pharmacotherapy targets and biomarkers of treatment response. We have openings in both human clinical research and in our basic science lab.

INTERESTED IN WHAT WE DO? CONTACT US AT AUTISM@CCHMC.ORG PLEASE INCLUDE YOUR RESUME OR CV FOR CONSIDERATION

WE SEEK BRIGHT, MOTIVATED UNDERGRADUATES WITH A PASSION FOR RESEARCH, NEUROSCIENCE, AUTISM AND RELATED DEVELOPMENTAL DISORDERS

➢ Hiring Entry Level Behavior Technicians at Gateway Learning Group

Gateway Learning Group is an Applied Behavior Analysis (ABA) provider in the East Bay. ABA is an applied science devoted to the development of strategies that produce socially significant changes in behavior. It is currently being utilized to treat individuals with ASD, ADHD, TBI, dementia/Alzheimer's, ODD, and many other diagnoses.

A background in ABA can help those working in the field of psychology with techniques not only to support individuals with special needs, but also to help anticipate, mitigate and eventually avoid problem behaviors altogether.

Gateway Learning Group currently has openings for entry-level part-time Behavior Technicians. We are hiring both undergraduate and graduate students, and offer flexible work schedules to accommodate school schedules.

To learn more about Gateway, visit our website: https://www.gatewaylg.com/
Gateway Learning Group is a leader in providing behavior therapy for children with autism. Every day, Gateway advances lives through compassionate, evidence-based treatment.

Come join the Gateway team and become part of a growing organization with a dynamic culture and a passion for making a difference. Become a Behavior Technician!

Fulfilling duties:

- Provide 1:1 play-based instruction to clients using techniques from the field of Applied Behavior Analysis.
- Teach children with special needs new skills in adaptive behavior, academics, and social skills.
- Collect onsite data (company iPad provided).
- Attend trainings and meetings as requested.

Employee benefits:

- Comprehensive training including in-field observations, coaching, and ongoing monthly trainings.
- Excellent opportunities for professional growth and competitive pay.
- Mileage reimbursement and paid drive time.
- Paid time off (PTO) and 401k benefits.
- Medical, vision, dental and life insurance benefits for full-time staff.
- Regular social events, sporting events and company-sponsored volunteer activities.
- A responsive mentor for every employee.
- BCBA supervision and reimbursement for those pursuing BCBA graduate coursework.

Requirements:

- A high-level of energy and a passion for working with a diverse population of children.
- Willingness to drive or take Muni an average of 45 minutes to end from client locations.
- Complete company paid training and RBT (Registered Behavior Technician) certification.
- High School diploma required. AA (or equivalent units) or 60 units of college coursework preferred.
- Must pass DOJ & FBI background check and TB test.

In order to promote your success as a Behavior Technician (BT) at Gateway, you will work under the supervision of a Board Certified Behavior Analyst (BCBA), and will be paired with a dedicated mentor from day one.

Want to learn more? Visit our website: www.gatewaylg.com

To join the team, submit your BT application at: www.gatewaylg.com/careers

Or email your resume to Kimberly Gutierrez at: kimberlys@gatewaylg.com

➤ Science/Health-Related Majors - Job Opportunity

ScribeAmerica is a company that hires and trains Medical Scribes for Board Certified Physicians. We are currently recruiting University of California-Berkeley students and alumni to work in our Oakland / San Francisco, CA facilities. To apply go to: https://www.scribeamerica.com/career-opportunities/. Lastly, our FAQ page (www.scribeamerica.com/faq) has a lot more useful information about our company and other employment opportunities that we have available.
Work Opportunities – Week of December 16, 2019

DOCTORS SAVE LIVES.
SCRIBES SAVE DOCTORS.

WHAT IS A MEDICAL SCRIBE?
A Medical Scribe is a revolutionary concept in modern medicine. Traditionally, a physician’s job has been focusing solely on direct patient contact and care. However, the advent of the Electronic Health Record (EHR) has created an overload of documentation and clerical responsibilities that slows physicians down and pulls them away from actual patient care. To relieve the documentation overload, physicians across the country are turning to Medical Scribe services.

WHAT WE EXPECT FROM YOU:
- Responsibility
- Punctuality
- Confidence
- Ability to multitask
- Maturity
- Self-Motivation

WHY BECOME A MEDICAL SCRIBE?
For someone interested in medicine, whether it is a personal interest, or part of a career goal to become a physician or physician assistant, the chance to become a Medical Scribe is unlike any other opportunity available. It offers exciting one-on-one collaboration with a physician, and is unprecedented in its level of exposure to real medicine in practice.

WHY BECOME A MEDICAL SCRIBE?
For someone interested in medicine, whether it is a personal interest, or part of a career goal to become a physician or physician assistant, the chance to become a Medical Scribe is unlike any other opportunity available. It offers exciting one-on-one collaboration with a physician, and is unprecedented in its level of exposure to real medicine in practice.

A background in Medical Scribing is quickly becoming the standard for pre-medical experience, and is suggested by medical school acceptance committees across the country. The competition to become a Medical Scribe is intense, and the demand for Medical Scribe services across the country has never been higher.

Visit scribeamerica.com/apply to see if we are hiring in your area.

INTELLIGENT CANDIDATES who can work positively and cooperatively amidst a stressful and unique environment.

COMMITMENT:
Commitment to ScribeAmerica: 2 years part time or 1 year full time, 8-12 shifts per month.
Positions Open at CoPsyN Sleep Lab at Stanford University

The Computational Psychiatry, Neuroimaging and Sleep Laboratory (CoPsyN Sleep Lab) is currently recruiting for 2 motivated and compassionate Assistant Clinical & Neuroimaging Research Coordinators for projects investigating the relationships between sleep disturbances, brain function, and emotional well-being. The CoPsyN Sleep lab is focused on translational clinical research and utilizes human neuroimaging, high density EEG, computational methods, and clinical psychology to examine the role of sleep physiology in the development, maintenance, and treatment of psychopathology across the lifespan.
Current projects include:

- An NIH funded clinical trial studying sleep disturbance and emotion regulation in individuals with Mild Cognitive Impairment (MCI) and mild Alzheimer’s Dementia.
- NIH and VA funded clinical trials examining mediators and moderators of response to non-drug treatments for insomnia in older adults and Gulf War Veterans.
- A Stanford funded pilot examining sleep as a mediator/moderator of rTMS antidepressant effects in those with treatment resistant depression.
- A Kleine-Levin Syndrome (KLS) Foundation funded study which aims to identify actigraphy derived subtypes of KLS.

We are looking for an Assistant Research Coordinator to be an active contributor to all aspects of study operations and work closely with the Principal Investigator, Dr. Andrea Goldstein-Piekarski. The right person for this job will be able to hit the ground running and take responsibility for participant recruitment, fMRI scanning, hdEEG data acquisition, and data organization. We are looking for someone who is detail oriented and can trouble-shoot independently while recognizing when to ask questions. Comfort and skill with working with a diverse patient population is essential. There will also be opportunities to gain research experience in additional areas, such as in data analysis, fMRI and EEG pre-processing procedures, actigraphy, basic wetlab training to process genetic samples, scientific presentations and reports to NIH.

The position will be based within a collaborative team and the CoPsyN Sleep Lab values diversity, cooperation, fairness, efficiency, and conscientiousness. The CoPsyN Sleep lab is committed to maintaining an inclusive and supportive environment for all members regardless of race, religion, color, national origin, sex, disability, age, veteran status, and other protected status.

Interested candidates should include a CV and Cover Letter addressing how your education and experience relates to the position as described above.

Duties include:

- Serve as primary contact with research participants, sponsors, and regulatory agencies
- Attach and calibrate polysomnography and EEG equipment in clinical setting
- Coordinate functional MRI scanning sessions and pre/post scan procedures
- Coordinate studies from start-up through close-out
- Determine eligibility of and obtain informed consent from study participants according to protocol
- Assist in developing recruitment strategies
- Coordinate collection of study specimens and processing
- Administer study cognitive and neuropsychological tests and collect medical information according to protocols
- Collect and manage patient and laboratory data for clinical research projects
- Manage research project databases, develop flow sheets and other study related documents, and complete study documents/case report forms
• Ensure compliance with research protocols, and review and audit case report forms for completion and accuracy with source documents
• Prepare regulatory submissions, and ensure Institutional Review Board renewals are completed
• Other duties may also be assigned

**DESIRED QUALIFICATIONS:**
• 1-2 years of related hands-on experience in acquiring and/or processing data that requires a high level of technical skill and attention to detail (including but limited to functional MRI, EEG, lab-based assays etc.)
• Experience working with cognitively impaired, anxious, or sensitive populations
• Previous research experience in psychological test administration, research design, and statistical analysis
• Hands-on experience administering structured diagnostic interviews such as the SCID, MINI, and/or ADIS
• Strong interest of human neuroscience techniques and experimental design including EEG and fMRI
• Effective communication skills, both orally and in writing
• Highly reliable with demonstrated organizational ability
• Accurate record keeping and attention to detail

**EDUCATION & EXPERIENCE (REQUIRED):**
Two year college degree and one year of relevant experience or an equivalent combination of experience, education, and training.

**KNOWLEDGE, SKILLS AND ABILITIES (REQUIRED):**
• Strong interpersonal skills.
• Proficiency with Microsoft Office.
• Knowledge of medical terminology

➢ **UCSF School of Pharmacy – Outreach & Recruitment Coordinator**

The **UCSF School of Pharmacy** Office of Student & Curricular Affairs is conducting a search for our **Outreach & Recruitment Coordinator** position (Admissions Recruitment Specialist III).
We expect to begin reviewing applications/candidates in mid-December.
Please feel free to forward this email. I'd be happy to answer any questions.

**Joel W. Gonzales**
Director of Admissions
UCSF School of Pharmacy
415.502.5368
Supportiv - Open Team Lead Position
Supportiv, the world’s fastest-growing online peer-to-peer support network, is seeking a Team Leader for its Global Community of Peer Support Moderators.

To apply, please send a resume and cover letter to info@supportiv.com with the subject line “Applicant for Team Leader, Moderator Community.”

We are seeking a Peer Support Moderator Team Leader to join us in our Berkeley, California headquarters. As a critical member of the leadership team, you’ll have three primary responsibilities:

1. Coaching the members of the moderator community to provide the highest-quality user experiences
2. Improving the work experience for moderators by co-creating new digital platform features, learning tools, and support mechanisms
3. Growing the moderator community

Overview of the role:
- Be the primary interface for resolving moderator questions, requests, escalations, etc.
- Serve as our peer counseling “resident expert” able to provide spot feedback on how user interactions could or should be handled and define best practices
- Provide continual coaching and feedback to moderators on their skill improvement, including review of chat transcripts and usage of crisis protocols, triaging, and referral to specialized services
- Collaborate with the technical team to automate aspects of the transcript review process and help build real-time monitoring dashboards
- Create and lead a moderator-only online community for FAQs, welcoming new moderators to the team, experience sharing, learning materials sharing, de-stressing and re-motivating
- Aggregate and translate moderator feedback into product enhancement suggestions that address community needs
- Partner with our clinical advisor from Stanford University to continually improve our online training course, materials, tools, and learning exercises for moderators
- Administrative management of recruiting, training, and onboarding new moderators, including management of junior recruiting coordinators
- Administrative management of moderator payroll

The following background and experience is preferred:
- Master’s degree in clinical or counseling psychology preferred. Talented and capable B.A., B.S. degree holders also encouraged to apply.
- Excellent project management, organization, and communication (both verbal and written) skills
- High moral character, high EQ, and dedication to helping others learn
- Passion for healthcare and mental health
- Obsession with creating the most positive peer-to-peer user experience possible
- Enjoyment of innovating and creative problem solving
• Desire to join a small but rapidly growing team that likes to have fun at work!

➢ Job Opening at UCSF Memory and Aging Center

Our team is currently searching for an Assistant Clinical Research Coordinator to join our team full-time.

The Memory and Aging Center is a prestigious research institution devoted to understanding and promoting brain health. Among the diverse projects at our center, our team has created a tablet-based software platform for the administration of clinical and research tools, designed to measure cognitive functioning. Our dream is to implement this platform in primary care setting for the detection of neurodegenerative diseases including dementia, and we need additional assistance in the lab to keep our project running. The Assistant Clinical Research Coordinator would help with data collection (including administration of cognitive tests), data and study management, analysis, engaging clinicians and researchers that are interested in our tool, and more.

For more information about the position, [Apply here](#).
