IRLE Speaker Series: Hilary Hoynes, 3/14/19

**Lecture:** Is the Social Safety Net a Long-Term Investment? Large-Scale Evidence from the Food Stamps Program  
**Speaker:** Hilary Hoynes, UC Berkeley  
**Date:** Thursday, March 14, 4-6pm  
**Location:** 2521 Channing Way

**Description**  
After Social Security, the Food Stamp Program touches the lives of more American families than any other element of the social safety net. What is the impact of this program on the long-term outcomes of children who receive these resources early in life?  
Hoynes uses the rollout of the Food Stamp Program between 1961 and 1975 to examine the impact of an increase in economic resources during childhood on human capital, labor market outcomes, neighborhood, and mortality. Using novel large-scale data from the 2000 Census, American Community Survey, and Social Security Administration NUMIDENT, this research analyzes data on 43 million individuals. She finds that access to food stamps in childhood leads to long-term improvements in human capital, quality of life, and mortality. As more families come to rely on the social safety net, cultivating a better understanding of the long-term effects of food stamps is critical.  
This event is co-sponsored by the Haas Institute for a Fair and Inclusive Society and the Goldman School of Public Policy.

**Register**  

**About the Speaker**  
Hilary Hoynes is a Professor of Public Policy and Economics at the University of California Berkeley. She holds the Haas Distinguished Chair in Economic Disparities and also co-directs the Berkeley Opportunity Lab. Her research focuses on poverty, inequality, food and nutrition programs, and the impacts of government tax and transfer programs on low income families.

**Is the Social Safety Net a Long-Term Investment?**
**Large-Scale Evidence from the Food Stamps Program**
Hilary Hoynes, UC Berkeley
**Thursday March 14 | 4-6pm**
2521 Channing Way

After Social Security, the Food Stamp Program touches the lives of more American families than any other element of the social safety net. What is the impact of this program on the long-term outcomes of children who receive these resources early in life? Hoynes uses the rollout of the Food Stamp Program between 1961 and 1975 to examine the impact of an increase in economic resources during childhood on human capital, labor market outcomes, neighborhood, and mortality. Using novel large-scale data from the 2000 Census, American Community Survey, and Social Security Administration NUMIDENT, this research analyzes data on 43 million individuals. She finds that access to food stamps in childhood leads to long-term improvements in human capital, quality of life, and mortality. As more families come to rely on the social safety net, cultivating a better understanding of the long-term effects of food stamps is critical.

Explore the Written World: The Spring 2019 LEP Global Book Club!

The SLC Language Exchange Program is excited to welcome students to our Spring 2019 LEP Global Book Club! We began this endeavor last semester with the goal to explore literature from all over the world and broaden our perspectives. The conversations we had for our first novel, Maxine Hong Kingston’s The Woman Warrior, gave us a deeper understanding of not only the world but also ourselves.

This semester, we have chosen to read The Displaced: Refugee Writers on Refugee Lives. Edited by Cal alum and Pulitzer Prize-winning author Viet Thanh Nguyễn, this anthology features the stories of refugee writers from all over the world. These firsthand accounts of their experiences provide us with an intimate and personal view of the reality that millions of people face in our current moment, allowing us to enhance our empathy towards others and reflect on our own understandings of identity, belonging, and sense of home.

National Student Leadership Conference Hiring

The National Student Leadership Conference is a summer academic and leadership program for high school students. This program will provide students with a remarkable opportunity to meet healthcare professionals, established healthcare facilities, and develop their leadership skills through hands-on clinical simulations in diverse fields of healthcare. We have a great Psychology & Neuroscience program that has been well received by staff and students alike.

I am currently in the process of hiring staff for this summer and am interested in the position being advertised to every student studying psychology and/or neuroscience at your university. Our **Team Advisor (TA)** and **Assistant Team Advisor (ATA)** positions are amazing employment experiences and networking opportunities for undergraduate students, specifically those studying psychology and/or neuroscience, and I would love to have some students on my staff representing your university. More information about the position and requirements for it can be found here [https://www.nslcleaders.org/about-summer-youth-programs/summer-job-opportunities/](https://www.nslcleaders.org/about-summer-youth-programs/summer-job-opportunities/)
We are looking for rising sophomores, juniors, and seniors. We are in need of male applicants, in particular, so if you could heavily market the position towards male students that would be great. Applications should be submitted as soon as possible, as positions are filled on a rolling basis.

I would greatly appreciate it if you could forward this information to your psychology/neuroscience students through an email blast or through a job portal. For more information about NSLC and our programs, please visit www.nslcleaders.org. Please let me know if you have any questions.
