Nevada Teacher Corps, 3/30

After graduation, how will you launch a high-impact career in Nevada?

Historically, high-need students in Las Vegas have not had equal access to an education that adequately prepares them for college and career. Nevada Teacher Corps trains recent college graduates from all educational backgrounds to become exceptional, certified, elementary school teachers. Our fast-paced seven-week summer training program focuses on the essential skills that teachers need most to start strong. Fellows will repeatedly practice foundational classroom management and instructional techniques, receive direct feedback from skilled coaches, and must pass a series of evaluations to be eligible to start teaching in the fall. Fellows continue to receive coaching and support throughout their first two years of teaching.

Do you have what it takes to join this elite group of educators?

Apply here - our priority application deadline is March 30th.

Outpatient & IOP Clinic Operations and Research Associate, 3/31

Position: Outpatient & IOP Clinic Operations and Research Associate
Portland DBT Institute, Inc., Portland, OR

About Us:
Portland DBT Institute (PDBTI) is located in the heart of Portland, Oregon. We are a free-standing, outpatient clinic and training institute that serves both public and private sectors. We are an interdisciplinary team that places high value on ongoing professional development, providing quality service to clients of all backgrounds, and creating a supportive and equalitarian environment in which to work. We offer comprehensive outpatient DBT, DBT Intensive Outpatient Treatment (IOP). In addition to a wide range of clinical services, PDBTI provides training, consultation, and supervision in DBT regionally and throughout the United States. A robust in-house training program is available to all PDBTI staff to further enhance mastery of DBT and CBT. The Research Assistant (RA) will have the opportunity to work closely with DBT experts, Linda Dimeff, PhD (Institute Director) and Andrew White, PhD (Associate Director), in conducting and presenting DBT research. The RA will also have the opportunity to
assist in operations and quality improvement efforts for one of the largest free-standing DBT clinics in the world.

PDBTI provides a full array of DBT services for adults, young adults and teens. Specialty programs include: DBT for Eating Disorders, DBT for Substance Abusers, DBT for PTSD and BPD. We also offer medication management services and provide a number of services designed to treat environments (e.g., Family & Friends Orientation Workshop, DBT-influenced couples and family therapy). We are a state licensed clinic and comply with all state requirements related to quality assurance and consumer protection. We are certified by the DBT-Linehan Board of Certification. For more information about our program, please see our website at www.pdbti.org. We are eager to develop a successful research mentoring program for post-baccalaureate undergraduates seeking highly competitive PhD programs in clinical psychology.

**Job Description:** This position is ideal for highly motivated, academically outstanding, graduate school-bound post-baccalaureates because of the wide range of opportunities afforded by this job. Task performed by the Outpatient and IOP Clinic Operations and Research Associate will include a wide range of clinic activities across three domains: Operations, Research, and Clinical. This position reports directly to PDBTI’s Associate Director, Andrew White, PhD.

**Operations activities** include: tracking clinician caseloads; overseeing administration of patient outcomes assessments; providing onboarding training and supervision for all new clinician employees; recruiting, screening, and providing operational oversight of an IOP service line managing other group co-leaders. **Research activities** include: aiding in writing and submitting human subjects applications; implementing clinic policies and procedures for conducting research; cleaning and analyzing data in preparation for presenting and publishing papers. The associate will have opportunities to serve as a co-author on presentations of data and publications. **Clinical activities** include: co-leading DBT skills training groups in IOP program, developing/overseeing a DBT skills training fidelity process applying best practices. The associate will learn DBT skills and know how to teach them with complex, multi-diagnostic patients by serving as a co-leader as well as operations administration.

The ideal candidate will be: ambitious, highly motivated, tech-savvy, efficient problem-solver, and highly personable with a broad range of skills including: exceptional project management and organizational abilities, a strong writer, excellent communicator, and a fan of details. Because a central responsibility will involve care and oversight of our research participants who are clinic clients and co-leading DBT groups, we are particularly interested in individuals with a natural talent in forming strong professional relationships based on genuine regard, warmth, and competence.
Other responsibilities will include:

- Conducting literature searches and extracting key content
- Establishing and maintaining strong relationships with clinician and patient research participants
- Oversee conduct of clinic wide efforts to gather outcome measures, track compliance, and facilitate data completion by clinicians and patients.
- Aid clinic leaders in developing research infrastructure
- Aid in data cleaning, data analyses, and writing up research findings.
- Developing study materials and protocols
- Creating and maintaining databases

Essential Qualifications:

- Friendly, personable, and approachable
- Excellent communication skills, in person, writing, and via email
- Highly detail oriented, organized and thorough
- Comfortable making phone calls
- Tech savvy; not intimidated by learning new technology
- Active problem-solver and independent worker
- Background, or interest, in health or mental health
- Effective in an unstructured environment; a self-starter who doesn’t require supervision and oversight
- Able to juggle many balls (metaphorically, of course) at one time
- Enthusiastic team-member who thrives in tight-knit environment
- Research experience

Applicants:
Candidates will be required to live in the Portland, OR or Salem, OR area and commute to our offices post-Covid. Starting salary is $40,000. Position is full-time with benefits. Please send letter of interest, unofficial transcript, and resume to ndunn@pdbti.org. Applications will be accepted through March, 2021. Start date is negotiable.

Boston University Research Assistant Needed, 4/1

Research Assistant/Technician Opportunity in Military/War-related Traumatic Stress, Moral Injury, and PTSD
The Boston VA Healthcare System is seeking a research assistant/technician to work under the direction of Brett Litz, Ph.D., Professor, Departments of Psychology and Psychiatry, Boston University and Director of Mental Health for the Massachusetts Veterans Epidemiological Research and Information Center (MAVERIC). Dr. Litz’s lab is a very active and dynamic setting, allowing for involvement in many studies and initiatives related to the treatment of PTSD and trauma-related problems in service members and veterans, and moral injury. Responsibilities include assisting Dr. Litz and the post-doctoral project directors in his lab with various research functions including data management and organization, grant administration, literature reviews, and administrative tasks in support of lab projects. Opportunities for authorship on presentations and/or publications are available. Mentorship by postdoctoral fellows is provided. Salary is highly competitive, and benefits are available.

Requirements: A BA/BS in psychology or related discipline and strong organizational and interpersonal skills. Fluency with statistical software and prior laboratory research experience is preferred.

Anticipated start: June 2021.

Duration: 2 years (a second year is secured after a successful first year review), with possibility of additional extensions.

Inquiries: Resume/CV with accompanying cover letter describing research interests and career goals, as well as any questions, should be sent to Ruth Chartoff at Ruth.Chartoff@va.gov. Applications will be reviewed on a rolling basis and will be reviewed until the position is filled or by April 1st at the latest.

---

Project Coordinator Position at the Yale Stress Center

Project Coordinator Position opening at the Yale Stress Center, Yale University School of Medicine.

Immediate opening for a full-time project coordinator and/or senior research assistant to help coordinate and implement ongoing studies at the Yale Stress Center focused on stress, emotions, and addiction, with an emphasis on NIH-NIDA and NIAAA funded studies testing the efficacy of pharmacologic treatments to reduce alcohol and substance use outcomes, using various cutting edge web-based and smartphone-based data collection tools as well as human experimental and neuroimaging procedures to identify biobehavioral markers of treatment response. There are three primary responsibilities for the position: (1) Study coordination and oversight, including
but not limited to administering research assessments, overseeing recruitment, retention, and tracking of study participants, and supervising and training post-graduate assistants, (2) Data collection, including self-report, interview, behavioral, biological, diagnostic and/or fMRI, and assessments at substance use treatment centers and public locations in the greater New Haven area, (3) Data entry, management, and analysis. The qualified candidate will have a Bachelor’s or Master’s degree from an accredited college with a specialization in psychology (or a related field) or any combination of subsequent education and experience. Experience/skills in consenting and administering assessments with research participants, working with clinical populations and individuals from diverse backgrounds, communicating effectively both orally and in writing, and working in a team setting is preferred. Interested candidates should contact Professor Rajita Sinha at rajita.sinha@yale.edu or Dr. Stephanie Wemm (stephanie.wemm@yale.edu) and submit a cover letter, CV/resume, and list of 3 references.

Clinical Research Assistant Job Opportunities

The Clinical Research Department at the Nathan Kline Institute for Psychiatric Research (located just outside of NYC) is seeking to hire two full-time Clinical Research Assistants in the late Spring or early Summer of 2021! These two positions would be ideal for candidates who are interested in pursuing Clinical PhD or Medical School programs in the future, as they offer incredible research and clinical experience. Both RAs will work with patients with mood and psychotic disorders, and one position has a special focus on MCI/Dementia/cognition in aging.
Full-Time Research Assistant Position at the Nathan Kline Institute for Psychiatric Research

The Clinical Research Department at the Nathan Kline Institute for Psychiatric Research (NKI) in Orangeburg, NY invites applications for a Research Assistant position. Our research involves clinical trials and investigations into the neurobiology of psychiatric disorders including mood disorders, neurocognitive disorders, and schizophrenia. The RA will work on an experienced multi-disciplinary team of psychiatrists, psychologists, social workers, and research nurses. They will coordinate depression and cognitive impairment studies, with potential involvement in schizophrenia studies, under the supervision of Drs. Dan Ioasfescu and Matthew Heptman. This is an excellent opportunity for obtaining research and clinical experience prior to applying for graduate or medical school. NKI fosters a collaborative environment where research assistants have the opportunity to gain excellent clinical and research experience, with the potential for publication.

Job Duties:
- coordinating clinical trials and/or imaging studies in Major Depressive Disorder, Mild Cognitive Impairment, and potentially Schizophrenia
- community outreach and recruitment
- pre-screening potential study participants
- conducting and documenting the informed consent process
- managing day to day activities of the study including scheduling, problem solving, communication and protocol adherence
- conducting clinical interviews and administering self-report scales
- performing medical tasks such as measuring vital signs, drawing blood, and administering EKGs
- data management including data entry, reviewing data for completeness and accuracy
- preparing progress and other reports for sponsors and other quality assurance/ethics oversight
- assisting in the preparation of grant proposals, manuscripts, other professional presentations
- assisting in preparation and maintaining regulatory documents and IRB submissions
- other technical and administrative support activities may be assigned

Job Qualifications:
- BS/BA in psychology or related field
- two-year commitment required
- prior research experience required
- clinical and/or research experience with psychiatric or medical populations is preferred
- willing to complete a phlebotomy certification course and perform blood-draws
- competent and comfortable with computers and technology
- excellent communication and interpersonal skills
- comfort in interacting with adult research participants
- excellent organizational skills and attention to details
- ability to work independently following initial instruction
- ability to work on a multi-disciplinary team

This position would begin in early summer of 2021.

If you are interested, please send a CV/resume and cover letter to Molly Irvin at molly.irvin@nki.cfmh.org
Full-Time Research Assistant Position at the Nathan Kline Institute for Psychiatric Research

The Clinical Research Department at the Nathan Kline Institute for Psychiatric Research (NKI) in Orangeburg, NY invites applications for a Research Assistant position. Our research involves clinical trials and investigations into the neurobiology of psychiatric disorders including mood disorders, neurocognitive disorders, and schizophrenia. The RA will work on an experienced multidisciplinary team of psychiatrists, psychologists, social workers, and research nurses. They will serve as the primary coordinator for research on neurocognitive disorders, with potential involvement in studies on mood disorders and schizophrenia, under the supervision of Dr. Dan Ioosifescu. This is an excellent opportunity for obtaining research and clinical experience prior to applying for graduate or medical school. NKI fosters a collaborative environment where research assistants have the opportunity to gain excellent clinical and research experience, with the potential for publication.

Job Duties:
- coordinating clinical trials and/or imaging studies in Mild Cognitive Impairment, with potential involvement in studies in Major Depressive Disorder and Schizophrenia
- neuropsychological and cognitive testing
- community outreach and recruitment
- pre-screening potential study participants
- conducting and documenting the informed consent process
- managing day-to-day activities of the study including scheduling, problem solving, communication and protocol adherence
- conducting clinical interviews and administering self-report scales
- performing medical tasks such as measuring vital signs, drawing blood, administering EKGs
- data management including data entry, reviewing data for completeness and accuracy
- preparing progress and other reports for sponsors and other quality assurance/ethics oversight
- assisting in the preparation of grant proposals, manuscripts, other professional presentations
- assisting in preparation and maintaining regulatory documents and IRB submissions
- other technical and administrative support activities may be assigned

Job Qualifications:
- BS/BA in psychology or related field
- two-year commitment required
- prior research experience required
- clinical and/or research experience with psychiatric or medical populations is preferred
- prior experience in aging, cognitive disorders, and elderly populations is preferred
- willing to complete a phlebotomy certification course and perform blood-draws
- competent and comfortable with computers and technology
- excellent communication and interpersonal skills
- comfort in interacting with adult research participants, especially older adults
- excellent organizational skills and attention to details
- ability to work independently following initial instruction, and on a multi-disciplinary team

This position would begin in late spring or early summer of 2021.

If you are interested, please send a CV/resume and cover letter to Molly Irvin at molly.irvin@nki.rfmh.org.
Photoshop Tutor Opportunity

Tech support needed!

Looking for an individual that is familiar with Mac and is proficient in Adobe Creative Cloud programs like Photoshop. Flexible schedule (fits to whatever works best for your schedule), virtual help that is compensated ($20/hour). Low time commitment weekly (2-3 hours). Experience working with neurodiverse population preferred, but not required! If interested, please contact aliciageng@berkeley.edu. Thank you!

NCIRE RA-I Position

The Stress and Resilience Lab at the San Francisco Veteran Affairs is looking to hire an additional clinical research coordinator.
Researchers (from the San Francisco VA Medical Center, Northern California Institute for Research and Education (NCIRE)) are conducting several investigator-initiated research studies of pharmaceutical and behavioral treatments for Posttraumatic Stress Disorder and insomnia. Studies are also being conducted in coordination with other sites in the US. This job will start as a remote position. Full-time is preferred but part-time is also an option. The incumbent will serve as an Assistant to the Project Coordinator for one or more of these projects and will provide day-to-day assistance to management including trial start-up, conduct, and closeout activities, and coordination with other study sites. The assistant will also provide administrative support for adjunctive VA, NCIRE, and UCSF studies. We are ideally looking for someone familiar with clinical trials.

**Essential Functions:**
- Assist research protocol and daily study operations
- Assist tracking/monitoring study progress to ensure adherence to timelines, SOPs, and applicable regulations
- Assist telephone screening interviews on psychiatric and medical symptomatology with participants to pre-assess for study eligibility
- Assist study recruiters remotely to ensure adherence to the enrollment goals of the study
- Responsible for providing and documenting Informed Consent
- Schedule all assessment and study visits and study procedures
- Assist the multidisciplinary study team in determining study eligibility, coordinating study procedures, and ensuring adherence to study protocol
- Assist data management, including entry, verification and analysis
- Assist with maintaining a rapport with each participant
- Assist with tracking budget, purchase equipment and supplies, and track study expenditures
- Assist with grant submissions, conference presentations, and manuscript preparation
- Perform other duties as assigned

**Qualifications:**
- BA/BS in psychology, nursing or related field required or combination of education and experience
- Computer literacy with emphasis on Windows operating systems
- Excellent interpersonal, written/oral communication and organizational skills
- Ability to manage multiple projects, tasks and priorities to achieve desired goals
- Strong accuracy and attention to detail
- Ability to work under minimal supervision

**Preferred Skills**
- Psychophysiology testing
- Understanding of FDA, ICH, and GCP regulations, guidelines, policies and practices for conducting clinical investigations
- Prior experience collecting, organizing, and shipping biological samples is preferred. Familiarity with Freezerworks or other biological sample software is not necessary but would confer an advantage
- Prior experience in psychophysiology measurement experience using Biopac or similar equipment is preferred

Additional information about the lab can be found on our website [https://starlab.ucsf.edu](https://starlab.ucsf.edu/)

To be considered for this position, please submit a cover letter, CV, transcript, and contact information for two references to Vera Kulikov at vera.kulikov@va.gov
Research Assistant at UPenn

NOW HIRING RESEARCH COORDINATOR/LAB MANAGER FOR SUMMER 2021

Full-time position in the Department of Psychology at the University of Pennsylvania: The Boundaries of Anxiety and Depression Lab is seeking a full-time research coordinator to manage the daily activities of the lab and assist with all stages of clinical research. Our research focuses on normal and abnormal experiences of worry, anxiety, depression, and stress, with particular emphasis on predicting and explaining the co-occurrence of anxiety and depressive disorders. The candidate will work directly with Professor Ayelet Ruscio in planning and overseeing a variety of research projects in our dynamic and supportive lab. Responsibilities include: participant recruitment and screening, data collection (including conducting clinical interviews), data management and analysis, literature reviews, assisting with manuscript and grant preparation, and coordinating the work of undergraduate research assistants in the lab. The candidate will have a meaningful role in designing and carrying out clinical studies and will receive mentoring and opportunities for professional development. Interested individuals will have the chance to learn advanced statistical skills, co-author publications, present at conferences, and pursue research of their own design. This is an ideal position for graduating seniors who would like to strengthen their preparation and competitiveness for graduate school in clinical psychology or a related field. For more information about our lab, please see http://web.sas.upenn.edu/ruscio-lab/.

Qualifications:

We seek a highly conscientious, organized, detail-oriented, and self-motivated individual who will have a Bachelor’s degree by August 2021. Majoring in psychology, previous research experience, and knowledge of SPSS are a plus, but not required. We look forward to working with a candidate who enjoys learning, is enthusiastic and hardworking, and is committed to pursuing graduate study in psychology or a related field. A 2-year commitment is preferred, ideally beginning in June or July 2021. To apply, please submit a cover letter, a vita/resume, and contact information for at least two references.

Please send application materials and any inquiries to Auburn Stephenson (auburnst@sas.upenn.edu).
UCB Lab Assistant in Cognitive Neuroscience

Lab Assistant Position in Cognitive Neuroscience at UC Berkeley

The Building Blocks of Cognition Laboratory at the University of California at Berkeley, headed by Professor Silvia Bunge, studies the cognitive and neural processes that support reasoning, memory, and goal-directed behavior in humans. To investigate these phenomena, the lab leverages behavioral, brain imaging, and eyetracking methods. This job opening is for a full-time research assistant to work on an National Science Foundation-funded project titled "How does the brain represent abstract concepts?" This study involves multivariate fMRI in healthy young adults, individual differences analyses, and computational modeling. The project will be carried out in collaboration with David Kraemer at Dartmouth College, Keith Holyoak and Hongjing Lu, a postdoctoral fellow, and a graduate student.

The Lab Assistant will be responsible for recruiting participants, collecting behavioral and brain imaging data, assisting with data analysis and data sharing, coordinating with trainees at the other sites, and carrying out general lab tasks. A strong background in STEM and extensive laboratory experience are required. Experience conducting MRI scans and managing the data is highly preferred; experience with fMRI data analysis would be ideal. We are looking for equity-minded applicants who represent the full diversity of California and who demonstrate a sensitivity to and understanding of the diverse backgrounds present in our community.

For additional details, please see the link to the full job description below.

Lab Assistant (9603C) #15437
University of California
Main Campus-Berkeley

DIRECTIONS:

2. Sign in to access your account or if you are not an existing user select the New User link to create one.
3. Review the job description and select the Apply button to begin your application.

If you are a current employee of UC Berkeley, please use this link instead.
Camp Baker Training Opportunity

Camp Baker at Judge Baker Children’s Center currently has undergraduate-level summer training positions available. Camp Baker is a therapeutic summer program based off of the Summer Treatment Program (STP) and is specifically designed for 6-12 year old children with ADHD. The STP has positive effects on the serious behavioral, social, and academic difficulties exhibited by children diagnosed with ADHD.

Summer trainees at Camp Baker will implement the treatment program in a camp setting for children with ADHD. They will receive extensive training and experience implementing the research-based intervention. Students with STP experience are often highly sought-after in graduate training programs in clinical psychology, social work, medicine, and education. Previous trainees within Camp Baker have gone in to successful careers in all of these fields.

Camp Baker is currently accepting applications for two roles: 1) Undergraduate Counselor and 2) Teaching Assistant. Please visit our website for a detailed description of roles and responsibilities for each position: https://campbaker.org/training-opportunities/

All aspects of the training program are supervised by a licensed clinical psychologist. Trainees typically gain over 200 hours of experience providing treatment directly to children. Opportunities for participating in behavioral parent training groups are also available.

Trainees complete a week-long training prior to the start of treatment and receive ongoing supervision. Training begins Thursday, July 1, 2021 with the July 4th holiday off. Camp Baker runs from Monday, July 12th and continues through Friday, August 20th, 2021. Trainees typically work from 7:30am until 4:30pm and stay from 7:30am-6pm one evening per week. The stipend for undergraduate-level positions this summer is $1,000.

Interested applicants should apply on the website under the training tab. Mandatory materials that must be uploaded are listed below:

- A cover letter describing your professional development goals and how Camp Baker might fit with those goals
- A current CV
- A de-identified assessment report, treatment report, or other psychology-related writing sample
- The name and contact information for your practicum coordinator (for applicants looking to gain practicum or academic credit)
Three letters of recommendation (sent to Dr. Tannenbaum from the recommender directly through the website)

**Institute of Reading Development Summer Teaching Positions**

**Teach Reading Classes to Students of All Ages**

*Now Accepting Applications for Summer 2021*

The Institute of Reading Development is now hiring summer teachers for our live online reading skills programs for students of all ages. Our programs provide students with the skills, books, and experiences they need to achieve greater success in school and beyond.

As an Institute teacher you will:

- Earn between $600-$700 per week.
- Improve your teaching skills and confidence during our comprehensive, paid training program.
- Gain valuable teaching experience with a variety of age groups from 4-year-olds to high school students.
- Help your students become successful readers with a love of great books.

We provide comprehensive training and ongoing support for our teachers, so we do not require teaching certification or experience to apply. All applicants must have a bachelor’s degree or higher and must be available to teach classes five days a week, including both weekend days. We are looking for full-time teachers with availability to work 37-40 hours per week during the summer. There will be some opportunities for continued employment with the Institute after the summer.

Successful Institute teachers:

- Have strong reading skills and read for pleasure.
- Are responsible and hard-working, with strong communication and organizational skills.
- Are comfortable and confident with technology.
Work Opportunities – Week of March 15, 2021

- Are patient and supportive with students and parents.

Apply Now

Learn more about us and our reading programs at https://readingprograms.org/about-us/.

Connectome Coordination Facility Position

The Connectome Coordination Facility in the Computational Imaging Lab (formerly known as the Neuroinformatics Research Group), is looking for a full-time, detail-oriented individual with excellent communication skills to help manage the vast amounts of behavioral and imaging data collected under the Human Connectome Project (HCP) family of studies. Assuming you are that individual, you will help manage data collected at multiple sites under multiple projects and shepherd that data from acquisition, through QC checks, staging for processing, pipeline processing, transfers to cloud-based storage for release staging, and ultimately through to public release. You will perform validation checks and review outputs of existing QC reporting to ensure the completeness and integrity of released data. You will work both independently and coordinate with research staff and scientists to resolve issues, clean data and help prepare it for public release. Familiarity with the Linux command line and experience with one or more scripting languages (e.g. Bash, Python) are strongly preferred.

Please see https://jobs.wustl.edu/ job ID 50726 or contact Mike Hodge and Eileen Cler (hodgem@wustl.edu and clere@wustl.edu), for more details.
Massachusetts General Hospital Clinical Research Coordinator positions

Clinical Research Coordinator positions at Massachusetts General Hospital/Harvard Medical School

We are currently looking to hire two clinical research coordinators to assist with three NIMH-funded studies using computational methods to model neurocognitive markers and ambulatory indices (i.e., mobile technology including actigraphy, passive sensing of physiological arousal, and ecological momentary assessment) of short-term risk for suicidal behavior in adolescents. Research coordinators will work under the mentorship of Dr. Richard Liu at Massachusetts General Hospital. These positions are particularly well suited for individuals seeking to gain research and clinical experience prior to graduate or medical school.

Duties & Responsibilities:
Responsibilities will include: data collection and management; participant recruitment, retention, and reimbursement; interfacing with the hospital clinical staff and participants recruited from the adolescent inpatient units; supervision of undergraduate volunteers; and IRB submissions and modifications. There may be opportunities to conduct independent research, submit presentations to national conferences, and prepare manuscripts for publication.

Qualifications:
Qualified applicants must have a bachelor's degree, strong writing and organizational skills, and be able to work autonomously as well within a collaborative team environment. Experience with data management and statistical software (e.g., SPSS, Mplus, R) and with writing scripts in E-Prime are preferred but not required. Psychology, sociology, and premed majors are encouraged to apply, but all are welcome. Prior research or clinical experience is strongly recommended.

Application information
The start date is Summer 2021. Interested applicants are invited to submit a cover letter and CV through the following link:
https://partners.taleo.net/careersection/ghc/jobdetail.ftl?job=3147559&tz=GMT-05%3A00&tzname=America%2FNew_York
Any questions regarding these positions may be directed to Rachel Levin at rylevin@mgh.harvard.edu
Coordinator Positions at the University of Georgia

I am looking to hire 3 new full-time research coordinators to work on grants in the Clinical Affective Neuroscience Laboratory at the University of Georgia. I was hoping you might be able to help spread the word to anyone looking for a postbac job. These positions are perfect for individuals looking to become more competitive before applying for clinical psychology or neuroscience PhD programs.

The coordinator will be responsible for day-to-day project duties, such as recruitment, clinical interviewing, neuropsychological testing, administering MRI scans, EEG acquisition, acquiring fluid biomarkers, data management, and data processing. Skills to be learned on the job will be beneficial for grad school preparation (e.g., administration of fMRI or EEG tasks and processing/analyzing data, clinical interviewing, statistics, coding in R etc) and the coordinator will have opportunities to publish papers/make conference presentations to become more competitive for grad school. Salary is $40k per year, with an expectation of a minimum 2 year commitment. Start date is flexible, with a range from May to July, 2021. Individuals graduating spring 2021 are eligible to apply.

The first position is funded by R01-MH116039 which supports the Georgia and Illinois Negative Symptom Study (GAINS). This is a multisite study (UGA, Emory, Northwestern) developing and validating novel next-generation negative symptom assessment tools specifically designed for youth at clinical high risk for psychosis, including a clinical symptom interview (the negative symptom inventory- psychosis risk), digital phenotyping (e.g., geolocation, accelerometry, ambient acoustics, ambulatory videos), and social media metrics. Here is a link to the NIH Reporter study description: https://projectreporter.nih.gov/project_info_description.cfm?aid=10071215&icde=53783766&ddparam=&ddvalue=&ddsub=&cr=1&csb=default&cs=ASC&pball=

The second and third positions are funded by U01-MH124639 which supports the Psychosis Risk Outcomes Network (PRONET). This is a 27 site multinational prospective longitudinal study that evaluates biomarkers and clinical risk factors predicting the development of psychotic disorders in youth meeting criteria for a prodromal syndrome. Methods include clinical assessments, digital phenotyping, natural language processing, neuropsychological tests, MRI, EEG, and fluid based (e.g., saliva, blood) biomarkers. Here is a link to the NIH Reporter study description: https://projectreporter.nih.gov/project_info_description.cfm?aid=10093852&icde=53783833&ddparam=&ddvalue=&ddsub=&cr=2&csb=default&cs=ASC&pball=
Our research is both transphasic (from prodromal to chronic phases of psychotic illness) and transdiagnostic (psychotic and mood disorders). Studies in our lab focus primarily on negative symptoms (eg, anhedonia, avolition, asociality), including phenomenology, etiology, assessment, and treatment. The CAN lab is a productive research environment, with 7 active externally funded grants totaling ~$9.5M and 20+ publications per year. In 2021-2022, the lab will include 2 postdocs, 4 graduate students, 7 full-time employees, and 2-4 undergraduates. Our clinical high-risk for psychosis research is supported by the Georgia Psychiatric Risk Evaluation Program (G-PREP) that provides clinical services to those with emerging mental health conditions within the UGA Department of Psychology. Services are supervised by Dr. Strauss (a licensed clinical psychologist).

More information about our lab, living in Athens Georgia (a great college town), and the University of Georgia can be found at: https://ugacanlab.com and our lab newsletter: https://img1.wsimg.com/blobby/go/78ca6852-3784-4127-845e-4b106ef2ef86/downloads/UGA%20CANLAB%20Newsletter.pdf?ver=1612378682996

The links to apply for the positions are located here:
- GAINS: https://www.ugajobsearch.com/postings/186869
- ProNet: https://www.ugajobsearch.com/postings/187286

Interested individuals can also feel free to email me at gstrauss@uga.edu (Gregory P. Strauss, Ph.D.) with any questions.

**Postbac Position in Miami, FL (FIU), 3/22/2021**

New postbac research positions are available at Florida International University in Miami, FL. These positions will help with the implementation of a recently funded R01 from NICHD to evaluate the efficacy of a brief remote parenting intervention to improve behavior and regulation in infants from high-risk families and prevent the need for later, more intensive treatment. Bilingual candidates (English-Spanish) and candidates with experience working with young children are particularly encouraged to apply.

In addition to submitting materials through the online portal, applicants for the postdoctoral position are encouraged to also send application materials directly to me at dbagner@fiu.edu (Daniel M. Bagner, Ph.D., ABPP). Review of applications will begin immediately.

**Research Coordinator I**
Job Summary

The Center for Children and Families, a University interdisciplinary center at Florida International University (FIU), has 44 faculty associates and more than 100 trainees in masters, doctoral, and professional programs across three colleges four colleges (Arts, Sciences & Education, Medicine, and Public Health,) who study child and adolescent mental health and typical development. The CCF has a tripartite mission that includes research, education, and service and it operates a world-renowned, multi-disciplinary clinic where state of the art, evidence-based treatments are offered to children and families from birth through high school. We offer both group and individual services for a variety of mental health conditions, including ADHD, anxiety, autism, and depression. National Institutes of Health (NIH) and other grant funding to the CCF exceeds $14 million annually.

Assists the research investigators by scheduling and administering remote assessments, including structured family observations, of research participants according to established protocols. Assists with coordination of participant recruitment, data collection and management, and scheduling of study sessions.

USC CAC Job Opportunity for Graduating Seniors

I am a program coordinator with USC's College Advising Corps. I have 20+ full-time job positions open for graduating seniors that I would like to share with you. At USC CAC, we work to advance educational equity for low-income, first-generation, and underrepresented students through college advising. Advisers deliver personalized and knowledgeable guidance on college admissions, financial aid, and enrollment in high schools throughout Southern California. Additionally, our advisers are full time employees of the University, and receive benefits.

To help the applicants learn more about the role, we will be hosting a virtual info session on Thursday March 25th from 1-2pm and would appreciate it if you could share this opportunity and flyer with your network and graduating seniors. Candidates can RSVP Here.
ABA Behavior Technician

ICAN-B is an Applied Behavior Analysis (ABA) service provider that currently serves families in Los Angeles, Ventura, Orange, San Mateo, and Oakland counties. We provide in-home health support to children diagnosed with autism and special needs.
We are currently looking for students to work as part-time or full-time (San Mateo only) Behavior Technicians. **Our need in the San Mateo County is very high and as such are looking to hire several candidates for the position!**

We are looking for individuals who are interested in helping children with Autism and other related disabilities. This is a great opportunity for students who are interested in Psychology, Child Development, and other Social Sciences fields. We could aid students as they journey on to complete their undergraduate degree and potentially turn this into a career, giving undergraduate students the opportunity to grow with us.

Starting Rate for the position $19.50+!

You can visit our website at [www.ican-b.com](http://www.ican-b.com)
San Francisco VA Medical Center RA

We are looking to hire someone into a full-time role starting as soon as possible (or shortly after graduation). Someone looking to gain hands on research experience before applying to grad school would be an ideal candidate. We are looking for a two year time commitment.
Folks can see the position description and apply here: https://recruiting.ultipro.com/NOR1032NCIRE/JobBoard/ae6d11d3-2f59-4e1f-8104-cb70bc41b619/Opportunity/OpportunityDetail?opportunityId=e84fecfd-3155-473b-87a0-680094a5c529

PAVIR Clinical Research Assistant

Application: https://www.applicantpro.com/openings/pavir/jobs/1708114

Palo Alto Veterans Institute for Research (PAVIR) is looking for a full-time Clinical Research Assistant to support a study comparing different implementation strategies to improve and sustain the delivery of cognitive processing therapy for PTSD across three different VA mental health systems.

We encourage you to apply if you have strong interest in mental health research, familiarity with data analytic software (e.g., R, SPSS, HLM), and experience conducting recruitment and working with study participants. It is rewarding to know that your hard work as a Research Assistant will make a difference in the lives of others.

ABOUT THIS ROLE
The Research Assistant will support the Principal Investigator (PI), Shannon Wiltsey-Stirman, Ph.D., and the Project Administrator with a variety of research duties, including subject recruitment and interviews, data collection, entry and coding, assisting with IRB submissions, as well as assisting with the preparation of manuscripts under direct supervision.

Dr. Wiltsey-Stirman serves as Acting Deputy Director of the Dissemination and Training Division, National Center for PTSD, and joined the Stanford faculty in 2016. Her research has been funded by the National Institute of Mental Health, VA, and the Canadian Institute for Health Research.

PAVIR offers generous benefits, including comprehensive health insurance, vision, dental, 13 paid holidays, paid vacation time, sick pay, a 401(k) with a fully vested 6% company match and 3% profit share, a wellness program, commuter benefits, and professional development training. Plus, we pay for life, short-term disability, and long-term disability insurance.

This is a full-time position located in Menlo Park, CA.
ABOUT PALO ALTO VETERANS INSTITUTE FOR RESEARCH (PAVIR)

PAVIR engages in the administration of funds and providing support for the conduct of clinical research at the Veterans Affairs Palo Alto Health Care System (VAPAHCS) to find new and improved ways to combat human disease and help people with disabilities. At PAVIR we work with more than 160 uniquely talented medical scientists. Our researchers have an active appointment with the VA Palo Alto Health Care System and maintain academic appointments with Stanford University. We recruit and retain talented employees who believe in making a difference in the lives of others through innovative health research.

JOB RESPONSIBILITIES OF A CLINICAL RESEARCH ASSISTANT

- Enter and maintain data in databases
- Assist with data tracking, cleaning, preparation and analysis
- Assist with the preparation of manuscripts and progress reports
- Code psychotherapy fidelity data and data from qualitative interviews and other sources, including medical records
- Assist with the recruitment of study participants
- Explain the study and study procedures to potential participants
- Obtain telephone or in-person consent per defined protocol
- Track participants for follow-up assessments
- Assist with conducting and transcribing qualitative interviews with clinicians and administrators
- Assist with IRB submissions and amendments
- Assist with preparation and organization of educational materials for study participants, maintain sharepoint/icohere/study websites to ensure that materials are current.

QUALIFICATIONS FOR A CLINICAL RESEARCH ASSISTANT

- Bachelor's degree (or equivalent experience)
- 1 year of related experience, including experience with data entry & management, or data analysis in a research environment
- Strong interest in clinical research and/or mental health research
- Interest in implementation of research methods
- Strong organizational skills and attention to detail
- Familiarity and previous use of data analytic software (e.g., R, SPSS, HLM)
- Ability to understand VA regulations and procedures regarding research
- Knowledge of standard concepts, practices, and procedures within the research field gained through education or experience
- Previous experience in follow-up data collection
- Ability to multitask and juggle multiple deadlines
Work Opportunities – Week of March 15, 2021

- Effective communication skills, both oral and written
- Good interpersonal skills in order to interact with study subjects
- Proficiency with Microsoft Word, Excel, and database software
- Ability to read and understand the study protocol
- Ability to complete directed tasks independently

DESIRED QUALIFICATIONS
- 2+ years of related experience, including experience conducting recruitment, obtaining informed consent, or performing study procedures with study participants
- Experience managing and analyzing data using R
- Some knowledge of the IRB submission process
- Previous experience conducting or coding qualitative interviews
- Previous experience in implementation or psychology research lab involving psychology protocol

ENVIRONMENTAL CONDITIONS: Exposure to an office and clinical environment.

READY TO JOIN OUR RESEARCH TEAM? Please fill out our initial 3-minute, mobile-friendly application. We look forward to meeting you!

PAVIR is a nonprofit foundation affiliated with the Veterans Affairs Palo Alto Health Care System (VAPAHCS). As a condition of employment, all PAVIR employees are required to have an approved Without Compensation (WOC) appointment with VAPAHCS and complete a background check before they can commence work.

PAVIR is pleased to be an Equal Opportunity Employer. Minorities, Women, Veterans, and Individuals with a Disability are encouraged to apply. We welcome and encourage diversity in the workplace regardless of race, color, religion, age, gender, sexual orientation, national origin, disability status, protected veteran status, or any other characteristic protected by law. If you need special assistance or an accommodation to apply for a posted position, please contact jobs@pavir.org - Human Resources department.

Research Assistant Position at Butler Hospital/Brown University

The Psychosocial Research Program at Butler Hospital is looking to hire a full-time research assistant to work on studies related to hospital aftercare programs for patients with severe mental illness (i.e., bipolar disorder, schizophrenia, and comorbid substance abuse). The position is available for immediate start. In particular, we are hiring for National Institute of Mental Health and American Foundation for Suicide Prevention-funded randomized controlled trials testing novel psychosocial interventions for patients following a psychiatric hospitalization conducted by Brandon Gaudiano, Ph.D. There may be opportunities to work on related projects testing psychosocial interventions in other populations (e.g., Veterans, those with suicidal behaviors). Butler’s Psychosocial Research Program, located in Providence, RI, is affiliated with the Warren Alpert Medical School of Brown University. For more information, please refer to the Principal Investigator’s webpage at: https://vivo.brown.edu/display/bgaudian

Butler Hospital is a Brown University-affiliated psychiatric and substance abuse hospital located in Providence, RI. Butler Hospital (est. 1844) is one of the earliest psychiatric facilities in the United States. The Psychosocial Research Program at Butler is one of several active research groups at the hospital. The program is comprised of academic psychologists, a psychiatrist, post-doctoral fellows, research assistants, master’s-level interventionists, and project coordinators. Research in this group is currently funded by numerous federal and private grants, and the majority of this work centers on post-hospital transitions, suicide prevention, mHealth, mood and psychotic disorders, and comorbid conditions (addiction and physical health problems) conducted in a variety of clinical settings.
