Vanguard Court Watch Intern Info Session, 5/25

Become a Vanguard Court Watch Intern!

We are looking for students interested in an exciting and challenging program monitoring and reporting court cases in the local courts. This is one of the only opportunities for undergraduate-level interns to go into the courtroom to observe live trials.

Due to covid, we are offering both online or in-person opportunities.

The Vanguard Court Watch is a non-profit organization that covers criminal cases through the California courts. **It offers student interns an opportunity to gain experience in the courthouse, watch and monitor cases, and develop their journalistic writing skills for a local online publication.**

Interns are sent into a *virtual* courtroom or attend court *in person* to take notes, monitor cases, and report on the happenings, as well as record observations about current court cases.

We also have opportunities for them to work on wrongful conviction reports and our COVID 19 behind bars project.

(Course Credit available upon arrangements with the institution).

We will be hosting an open enrollment and informational session on March 25 at 6 pm.

If you are interested in learning more or in applying, please join us via zoom on March 25 at 6 pm. Link below.

Topic: Court Watch Internship Informational Session

Time: May 25, 2021, 06:00 PM Pacific Time (US and Canada)

Casa de Esperanza Internship Program, year-round apps

Casa de Esperanza, a non-profit in Houston, Texas, provides residential care to children birth through six who are in crisis due to abuse, neglect, or the effects of HIV. Care is provided in our neighborhood by our Hands of Hope interns. Our interns, most of whom are recent college graduates, join us for a year of service (a twelve-month full-time post-graduation internship). Applicants wishing to complete shorter internships are considered on a case by case basis. We provide on-site housing (interns live with the children they are caring for) and interns join us from all over the United States to be part of our internship program.

Information about our internship may be found here:

<https://www.casahope.org/hands-of-hope-internship>

The application for our internship may be found here:

<https://www.casahope.org/application-part-one>

Interns in our program gain valuable experience that is relevant to a number of fields and future career goals while simultaneously making a meaningful difference in the lives of a vulnerable. We will have groups joining us in January, June, and August of 2021.

Want to make a difference in the lives of young children?

Casa de Esperanza seeks applicants for the Hands of Hope Service Year Program. Casa de Esperanza provides residential foster care to children ages birth through six who are in crisis due to abuse, neglect or the effects of HIV. For a complete description visit:

<https://www.casahope.org/hands-of-hope-service-year-1>. Our application can be found at:

<https://www.casahope.org/application-part-one>

TA-DA! Language Productions Internship

A hardworking, creative, outside-the-box thinker with an infectious POSITIVE ATTITUDE and smile - and seeking a unique internship experience with lots of real-world experience and networking ops?

Internship and Volunteering Opportunities: Week of May 10, 2021

We are TA-DA! Language Productions - a Silicon Valley/Luxembourg startup on the heels of greatness!

We innovate 'paper tech' - allowing the touch of a little finger to render normal paper responsive - like an iPad, yet with no screen! This in particular allows young children to learn (no matter what they may have access to at home) at the optimal age for language learning - which so happens to be the age most dangerous for screen usage.

TA-DA! Is brought to you by the very best in their fields, including industry execs, teachers/professors, and Oscar and Grammy winners. (One of the TA-DA! Co-founders was just nominated for both Classical Music Producer of the Year AND best Classical Album of the Year by the Grammys.) One of our Advisors is the #1 Children's Educational App maker of codeSpark, which has more than 30 million users. Our other key advisor is a legend in Publishing - the individual who took the publishing industry digital, worldwide.

We currently seek interns in the following domains:

- native speakers of world languages, particularly (but not limited to):

French

Mandarin

Spanish (various dialects)

German

Hebrew

Hindi

Japanese

Korean

Portuguese

- students of language

- students of education

- students of cognitive psych

- students of marketing/PR

- Graphic Design

- Web Design web

- Animation/illustration

- Sound engineering

Time commitment:

We require as little as 5 hours per week - unless your school requires specific conditions, which we of course adhere to.

Internship and Volunteering Opportunities: Week of May 10, 2021

Compensation:

We are bootstrapping, and currently fundraising, so like every TA-DA! core team member, no one is paid just yet, but we aspire for that to change very soon! Our first products go to market in February.

Please email our CEO Michelle Glorieux directly at Michelle@tadalp.com.

There is no specific deadline to apply.

Creative Research Challenge: Volunteer Mentors in Psychology Needed

Creative Research Challenge (CRC) is a program for community college students to conduct independent social sciences research around an annual theme--Covid-19 for 2021. We are looking for experienced student researchers at Cal from Psychology, Sociology, Political Science, and Economics to be mentors for community college researchers in the Spring semester. As a mentor, you can set up office hours based on your schedule (min 2 hours/wk) for 3 weeks in the spring quarter (Late-March to Mid-April) to help them with their research.

If you are interested in this opportunity, please contact UC Berkeley student Jay Zhao at: jay.zhao@berkeley.edu

Volunteer Summer Research Opportunity at UCB

A Doctoral Student at UC Berkeley's Clinical Science Psychology PhD program is looking for undergraduate research assistants to work with on a new exciting project this summer. The study is titled Personalized Detection of Distress States, and the goal of study is to identify and predict when an individual will go through distressful episodes.

If you are interested in learning more about the study and joining Dr. Fisher's lab: <https://www.dynamicpsychlab.com>

Any interested students, please email Jiyoung your resume/CV: jiyoungsong@berkeley.edu

Internship and Volunteering Opportunities: Week of May 10, 2021

Stanford RA Needed

Research Assistant Positions Available Neuroimaging/EEG/Clinical Psychology/Sleep Research

Two NIH funded RA positions are available in the CoPsyN Sleep Lab, headed by Dr. Andrea Goldstein-Piekarski at Stanford and the Palo Alto VA

The overarching goal of the CoPsyN Sleep lab is to understand how sleep contributes to psychiatric disorders, particularly depression, across the lifespan by using fMRI, high-density EEG sleep recordings, and computational approaches.

The position will be based within a collaborative team that values diversity, cooperation, fairness, efficiency, and conscientiousness and is committed to maintaining an inclusive and supportive environment for all members.

Current projects include two longitudinal neuroimaging and hd-EEG studies examining the impact of a sleep intervention on well-being and fronto-limbic brain function in individuals with 1) Depression and 2) Cognitive Impairment.

The RA would be deeply involved with participant recruitment, fMRI scanning, hdEEG data acquisition, and data organization. There will also be opportunities to gain research experience in additional areas, such as in data analysis, fMRI and EEG pre-processing procedures, actigraphy, basic wetlab training to process genetic samples, scientific presentations and reports to NIH.

Qualifications

- 1-2 years of related hands-on experience in acquiring and/or processing data that requires a high level of technical skill and attention to detail (including but limited to functional MRI, EEG, lab-based assays etc.)
- Experience working with depressed, anxious, or sensitive populations
- Previous research experience in psychological test administration, research design, and statistical analysis
- Hands-on experience administering structured diagnostic interviews such as the SCID, MINI, and/or ADIS
- Strong interest of human neuroscience techniques and experimental design including EEG and fMRI
