Become a Psych Peer Advisor, 5/22/20

The Psych Student Services Office (PsychSSO) is excited to announce that we will be recruiting new peers for the following academic year. If you'd like to join us, please submit the application no later than 5PM on Friday, May 22nd. Please refer to the application for the updated application details. Feel free to drop-in with one of our current peers to hear about their experience. Email psychsso@berkeley.edu if you have any questions!

Research Assistant Position in mHealth and SMI

The Psychosocial Research Program at Butler Hospital is looking to hire a full-time research assistant to work on a study related to mHealth and severe mental illness. The position is available for start in the summer of 2020. In particular, we are hiring for an NIMH-funded project focused on the development and testing of a new mobile intervention for patients with schizophrenia following psychiatric hospitalization, which is run by Brandon Gaudiano, Ph.D. and Ethan Moitra, Ph.D. Additional opportunities will be available to work on related projects.
testing interventions for patients with suicidality, bipolar disorder, and co-occurring substance use disorders. The Psychosocial Research Program, located in Providence, RI, is affiliated with the Warren Alpert Medical School of Brown University. For more information, please refer to faculty pages: https://vivo.brown.edu/display/bgaudian and https://vivo.brown.edu/display/emoitra

**Butler Hospital** is a Brown University-affiliated psychiatric and substance abuse hospital located in Providence, RI. Butler Hospital is one of the earliest psychiatric facilities established in the United States. The **Psychosocial Research Program** at Butler is one of several active research groups at the hospital. Dr. Ivan Miller is the Director and the program is comprised of academic psychologists, post-doctoral fellows, research assistants, master’s-level interventionists, and project coordinators. Research in this group is currently funded by numerous NIH grants, and the majority of this work centers on post-hospital transition interventions, suicide prevention, technology-assisted assessment and intervention, mood and psychotic disorders, and comorbid conditions (addictions and physical health problems) conducted in a variety of clinical settings (inpatient, partial hospital, and outpatient).

Full-Time Research Assistant at University of North Carolina at Chapel Hill

FULL-TIME POST-BACC RESEARCH ASSISTANT
UNC Chapel Hill

A full-time research assistant position is available for individuals at the BA/BS level at the University of North Carolina at Chapel Hill, beginning summer 2020. The position will involve assisting/coordinating a federally-funded study of adolescent girls' depression, self-injury, and suicide. The project involves the use of structured diagnostic assessment, questionnaire observational, and EMA assessments, longitudinal methods, and physiological data collection integrating biological models of stress reactivity. This position is for 2 years. Research assistants will receive substantial training in developmental psychopathology theories and methods, participant recruitment; data management; supervision of undergraduate research assistants; general research administration; and assistance with the preparation of grants and manuscripts. This position offers excellent experience for applications to doctoral programs in clinical or developmental psychology, as well as other mental health fields.

Applicants with some experience in psychology research are particularly encouraged to apply. A Bachelor’s degree in Psychology or a related field is required. Salary will be commensurate with qualifications. Interested applicants should submit a vita/resume and the names and emails of two references to mitch.prinstein@unc.edu. Review of applications will begin immediately. Applicants will be contacted only if selected for further consideration.
Job Opening for Psychology/Neuroscience Research Assistant/Lab Manager

Research Assistant (Lab Manager) position available
Fralin Biomedical Research Institute at Virginia Tech Carilion
Roanoke, Virginia

A full-time research assistant (lab manager) is sought for the labs of Dr. Pearl Chiu, Dr. Brooks King-Casas, and Dr. Stephen LaConte at the Fralin Biomedical Research Institute at Virginia Tech Carilion (http://research.vtc.vt.edu). Projects in the labs combine methods from experimental and clinical psychology, neuroscience, and behavioral economics with functional neuroimaging to investigate decision-making in healthy and clinical populations (current projects have a focus on borderline personality disorder, posttraumatic stress disorder, depression, substance-use disorders, at-risk youth, and traumatic brain injury). The research assistant will be responsible for recruiting and assessing research participants, implementing all aspects of study protocols, and maintaining positive communication with research participants and collaborators. Data collection involves various modalities including: behavior, fMRI, clinical interviews, genetic samples. Additional duties include managing participant databases, organizing project funds, and preparing and tracking IRB protocols. The research assistant is an essential member of the group and will be generally responsible for having overall knowledge of all lab projects and managing day-to-day logistics of the lab. Training will be provided for all aspects of the position. For motivated individuals, there are many opportunities to be involved with data analysis. This is an excellent position for candidates interested in graduate school in cognitive or clinical psychology, neuroscience, and related fields. Preference will be given to candidates who are willing to make a two-year commitment.

Minimum requirements include: 1) BA/BS in psychology, neuroscience, biology, or related field; 2) two years of research experience; 3) ability to work both independently and as part of a team; 4) demonstrated organizational skills and attention to detail; 5) demonstrated ability and desire to succeed in a fast-paced research environment with multiple concurrent duties; 6) excellent written and oral communication skills; 7) proficiency with MS Word, Excel, and PowerPoint or equivalent.

Other information: MA/MS candidates with clinical (clinical psychology, psychiatry) training will be considered; salary will be commensurate with experience. Candidates with data analysis and/or computer programming experience will be considered favorably.

Required application materials: Cover letter including statement of interest, CV/Resume, list of references. Two letters of recommendation will be required prior to final consideration.

Consideration of applications will begin April 8, 2020, and will end when the position is filled. Expected start date is as soon as possible. The Fralin Biomedical Research Institute at Virginia Tech Carilion is an Affirmative Action/Equal Opportunity employer and is committed to cultural diversity and compliance with the Americans with Disabilities Act.

Pre-submission inquiries with CV may be emailed to: Whitney Allen, whitneyma@vtc.vt.edu
Lab Manager for Dr. Pearl Chiu, Dr. Brooks King-Casas, and Dr. Stephen LaConte

VIRGINIA POLYTECHNIC INSTITUTE AND STATE UNIVERSITY
An equal opportunity, affirmative action institution
Please apply at:

**Paid Positions at the D-Lab**

The D-Lab is hiring for several exciting positions related to an [NSF-funded research project](#)!

Check out the descriptions below if you are interested in joining the team.

**Graduate Student Assistant**
The D-Lab is seeking an hourly Graduate Student Assistant to assist with successful implementation of our NSF IUSE research components; including logistics, student recruitment, and project documentation. The position will be for an average of 7 hrs/week for 7 months with the possibility of an extension. To apply, interested Berkeley graduate students should submit this application.

**Post-Doc in STEM Education**
The Postdoctoral Fellow will support a research agenda with a set of broad questions that are generalizable to undergraduate data science education in many types of four-year institutions. Interested candidates should submit this application to apply.

**Hiring a MAXQDA Consultant**
D-Lab is looking for a graduate student familiar with MAXQDA to serve as a consultant on an hourly basis. You would determine how many hours and when to work, allowing you to easily fit this into your current schedule. Common consultation requests are about how to upload data, create and apply codes, and use some of the tools in the “analysis” and “visualization” tabs. If you think you could be a good fit, please fill out this survey.

**The Family Institute Research Project Manager in Chicago**

The Family Institute is seeking a full-time (40 hours/week) entry-level, research project manager to oversee daily operations and assist with clinical interviews for two intervention studies. The first study is a multi-site RCT testing the processes and mechanisms of change accounting for significant reductions in intimate partner violence in an ACT-based intervention. The second study is a pilot test of a novel prevention program for young couples that includes attention to multiple domains of relationship functioning (e.g., conflict, support, emotional intimacy, sex).
Work Opportunities – Week of May 18, 2020

The Research Project Manager will work closely with the Director of Translational Science, and members of the Family Institute. Primary responsibilities involve managing daily operations including staff supervision and conducting clinical interviews. Strong organizational, supervisory and interpersonal skills preferred. Experience with project coordination and IRB/grant submissions desirable. Position involves working in a fast-paced environment within a multidisciplinary research team. Potential need for schedule flexibility to accommodate participant visits.

Minimum Qualifications: BA/BS and at least one year of prior experience with clinical research is required. The position requires attention to detail, organizational and planning abilities and excellent interpersonal skills. The individual in this position will be working on several projects simultaneously.

Please feel free to contact Erika Lawrence (elawrence@family-institute.org) if you would like more information. The job would start this summer. TFI is one of the few places that truly embraces a systemic perspective, as well as valuing both research and clinical work. And it’s in Chicago!!

**Project Coordinator Position at Zhou Culture & Family Lab, 5/19/20**

Full-Time Cantonese-Speaking Project Coordinators at UC-Berkeley Culture and Family Lab

Project Coordinator (9602C) - #7664
Culture and Family Study Lab (https://zhoulab.berkeley.edu/)
University of California
Main Campus-Berkeley
Job Summary

The position is ideal for motivated individuals looking to work with underserved populations, and/or develop as researchers before applying to graduate programs in psychology or related fields. Training includes opportunities to learn to administer multiple measures and tools, including psychological and language assessments, and classroom observations. Working with our lab also provides experience working with diverse, low income, immigrant families.

Project LEAD (Language, Emotion, and Development) is a longitudinal study funded by the National Institute of Health (PIs: Qing Zhou at UC-Berkeley & Yuuko Uchikoshi at UC-Davis). This study aims at investigating the links among bilingual development, executive function, parent-child and teacher-child relationships, and socio-emotional development in young children from Mexican American and Chinese American families. We will recruit 400 dual language learners (initially 3-4 years of age, 200 Chinese Americans, 200 Mexican Americans) from Head Start programs in the San Francisco Bay Area, and follow these children and their families annually for three years (from preschool to kindergarten). Three waves of multi-method data will be collected from children and families through classroom observation, home interview and observation, parent and teacher survey, and language and neuropsychological test. The data will be used to examine the reciprocal relations between bilingual and socio-emotional development in dual language learners and test the mediation and moderation mechanisms underlying the developmental pathways.

Responsibilities

The incumbent will work under the direct supervision of the PIs. Essential functions include:

- Recruit research participants from local preschool programs, maintain contact with preschool staff in coordinating recruitment events. (10%)
- Train and supervise undergraduate research assistants in conducting home assessments, data entry, and other lab tasks. (10%)
- Carry out psychological and behavioral assessments of preschool-age children and their parents at participants’ homes and preschools, and conduct classroom observations of teacher-child and peer interactions at preschools. (30%)
- Administrative tasks to maintain smooth functioning of lab day to day activities. (10%)
- Distribute and collect teacher questionnaires by mail or at preschool centers, track and maintain the teacher data. (10%)
- Documentation and record keeping. (10%)
• Maintain study databases using SPSS or Excel. (10%)
• Participate in regular lab meetings and supervision meetings with the PIs. (10%)

**Required Qualifications**
• Cantonese language skills (verbal, reading, and writing/typing).
• Experience in conducting interviews and behavioral assessments with adults and young children.
• Familiarity with audio-visual and camera equipment.
• General computer skills, including proficiency with Microsoft Word, Excel, PowerPoint, and SPSS. Ability to quickly learn and master computer programs, databases, and scientific applications.
• Excellent organizational, interpersonal, and verbal and written communication skills.
• Ability to interact and work effectively with culturally and experientially diverse children, families, and research team members.
• Ability to work under deadlines -- independently and with general guidance.
• Demonstrated ability to accurately complete detailed work.
• Strong analytical and problem-solving skills.

**Preferred Qualifications**
• Familiarity with the Chinese/Chinese American culture
• Prior research experience in the Psychology field, especially experience working in research labs or teams.
• Undergraduate coursework in statistics or research method, and/or equivalent training/experience.

**Salary & Benefits**
This position is a non-exempt, bi-weekly paid position. Hourly pay for this role is commensurate with experience.

Letters & Science is hiring Graduate Mentors $25/hour

Seeking graduate students from the areas of Arts & Humanities, Biological Science, Interdisciplinary Studies, Mathematics & Physical Science, Social Sciences, and/or students in professional school programs with liberal arts backgrounds to mentor L&S undergraduates. You'll help students explore their interests, get involved in research, form relationships with faculty, and plan for the future while gaining valuable work experience yourself.

Please submit your cover letter and resume as a single attachment when applying.

Other Information
This is a full-time, Career appointment. The incumbent is expected to work 40 hours per week, including at least one weekend shift.

This position is governed by the terms and conditions in the agreement for the Technical Unit (TX) between the University of California and the University Professional and Technical Employees (UPTE). The current bargaining agreement manual can be found at:
http://ucnet.universityofcalifornia.edu/labor/bargaining-units/tx/index.html

Conviction History Background
This is a designated position requiring fingerprinting and a background check due to the nature of the job responsibilities. Berkeley does hire people with conviction histories and reviews information received in the context of the job responsibilities. The University reserves the right to make employment contingent upon successful completion of the background check.

Mandated Reporter
This position has been identified as a Mandated Reporter required to report the observed or suspected abuse or neglect of children, dependent adults, or elders to designated law enforcement or social service agencies. We reserve the right to make employment contingent upon completion of signed statements acknowledging the responsibilities of a Mandated Reporter.

Equal Employment Opportunity
The University of California is an Equal Opportunity/Affirmative Action Employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, disability, or protected veteran status. For more information about your rights as an applicant see:

**Paid Contractor at Political Research Associates**

The Political Research Associates are building a map of three different and overlapping networks with MapBox. We built three different data sets for each of these networks, housed in a google spreadsheet. Each data set has between 80 and 500 rows. Each row represents a US county. The data has been joined with geographic data and we have the files as GeoJson.

We're looking for a paid contractor to help us with the following:

- We need to be able to customize the fill for each county. Mapbox lets us choose a range of colors, but we also need to be able to have hash-marks for the overlapped counties for accessibility and ease of viewing. This requires custom coding.
- Several of the data sets have a limited range of visibility. We’re looking for someone to help us transform the files such that the range of visibility in Mapbox is at least Zoom 3.17- Zoom 7.17.
- We need to be able to customize the pop-ups that are visible when a user either clicks on or hovers over a given county. Unclear if this needs coding, but would be helpful for a contractor to look into.
- Complete the project and debrief and train a PRA staff person so that we can maintain the map.

We’re looking for someone who can help us complete this project by May 20, 2020. Please contact contact@politicalresearch.org if you are interested!

**UROC Undergraduate Coordinator Positions**
WE’RE LOOKING FOR NEW COORDINATORS

Looking to make a difference on campus? As a UROC Undergraduate Coordinator you will assist underrepresented students of color start their research journey and in the process help make UC Berkeley a more inclusive space.

If you are passionate about educational equity, have previous mentoring and research experience we'd like to hear from you.

Interviews in May
SFVAMC paid, full-time Research Associate opportunity

Northern California Institute for Research & Education

Job Description

Position Title: Staff Research Associate 1

Reports to: Lab Manager

FLSA: Non-Exempt

Department: Research, Mental Health Services

Supervisory Responsibilities: No

Position Definition:
The incumbent will serve as a Staff Research Associate for two investigator-initiated research studies. Study one uses ambulatory technology to understand sleep disturbance in PTSD and study two examines doxazosin as a treatment for posttraumatic stress disorder. The Staff Research Associate may work on other studies as needed. This research is being conducted by researchers from the San Francisco VA Medical Center; Northern California Institute for Research and Education (NCIRE); and University of California, San Francisco.

Essential Functions:

- **Study 1:**
  - The Research Associate’s primary effort will be to provide clinical coordination for Study 1 (approximately 50% effort), in collaboration with the study’s Sleep Data Coordinator.
  - The Research Associate will take the lead on recruitment of study participants, screening procedures, self-report survey implementation, and scheduling and coordination of clinical assessments. In support of the study Sleep Data Coordinator, she/he will assist in timely scheduling of at-home sleep data collection procedures.
  - She/he will be responsible for UCSF and VA IRB and regulatory procedures with the support of the Lab Manager.
  - The clinical coordinator will be responsible, with the support of the Sleep Data Coordinator, for study recruitment which will involve broad recruitment within California based on VA and DoD lists of potentially eligible veterans as well recruitment via advertising and community outreach.
  - The clinical coordinator will be responsible for completion of and data quality monitoring of self-report survey and clinical data.
  - The clinical coordinator will be responsible, in support of the Sleep Data Coordinator, for sleep diary data collection and data quality monitoring.
  - The Clinical Coordinator will support the Sleep Data Coordinator to guide participants in proper use of at-home data collection devices (sleep diary, sleep profiler, actigraphy etc.) for sleep studies. This involves ensuring coverage for evening support (approximately 40% of nights or 2-3 evenings per week), with alternating shifts with Sleep Data Coordinator.

- **Study 2:**
  - For Study 2 (approximately 50% effort), the Research Associate will provide day-to-day support and assistance to the Senior Research Assistant, the Clinical Research Coordinator, Study Clinicians (Nurse Practitioner and or Study Physician), Sleep Core Leader, and Database Manager as needed.
  - Take a leading role in recruiting participants and informing them about the research study, including outreach within the VA and in the community.
  - Conduct telephone-screening interviews with participants to pre-assess for study eligibility.
  - Collaboration in preparing study visits, including initial screening intakes and participant visits.
Northern California Institute for Research & Education
Job Description

- Collaborate in subject tracking, scheduling, correspondence, appointment reminders, transportation and reimbursements.
- Collaborate in running study participants visits, including but not limited to: escorting study participants to VA sites for study procedures; assembling, distributing and collecting the clinician interview materials; administering self-report questionnaires; obtaining study drug from pharmacy, etc.
- Maintain study equipment and prepare the equipment for study procedures
- Collaborate in data entry, downloading, scanning, and verification.
- Assist with purchasing of study supplies
- Take the lead on management of sleep diary mobile application through an application web portal, AWS cloud-based server, and communication with mobile app developer as needed
- Assist with other research studies as needed (including but not limited to preparing materials for appointments, scheduling participants for appointments, making reminder calls, downloading data, data entry, scanning and verifying data, maintaining study supplies and equipment, etc.).
- Other duties as needed

Job Requirements:

- BA/BS degree in Psychology or related fields.
- 1-2 years of research experience is required; experience with human subjects is preferred; study coordination experience is preferred
- Prior experience with telephone interviewing is highly desirable.
- Excellent interpersonal, written, and oral communication skills
- Experience with data entry and cleaning is preferred.
- Computer literacy with emphasis on Windows operating systems and software applications.
- Proficient knowledge of graphic design software (Photoshop and Illustrator) is preferred.
- Ability to manage multiple tasks and priorities to achieve desired goals.
- Strong organization and problem-solving skills
- Ability to work with minimal supervision and work effectively in a team
- Commitment to working some evening hours and some weekend hours due to study protocol requirements
- Willing and able to travel to Santa Rosa VA Outpatient Clinic at least one day a week and other area VA and affiliated institutions as needed. Travel time to such clinics exceeding typical travel time to SFVA will be counted towards hours worked.

Working Conditions/Environment:
The work environment for this position is an indoor office environment and the hospital setting. During COVID-19 shelter-in-place circumstances, remote work options will be temporarily available as long as study procedures can be effectively carried out. The incumbent may sustain posture in a seated position and may utilize a computer terminal for prolonged periods of time. Recruitment will involve going to community and other VA sites and may involve driving.

The employee must occasionally lift and/or move up to 10 pounds. The employee may be exposed to chemical vapors such as from hospital-grade disinfectants and there may be skin contact with these substances. The employee may be exposed to potential biosafety hazards, such as human urine. The employee use latex gloves to perform these procedures.
