All Psych summer courses will now be online. Visit the academic guide for our course offerings!
This course will give a rigorous yet accessible overview of our current understanding of how the brain works and how it is altered by experience. Specifically, the class provides: an introduction to the structure and function of the sensory and motor systems; discussions of disorders and phenomena such as blindsight, synaesthesia, color blindness, and phantom limbs; and a lecture with presentation of classical experiments on the capacity of the young and adult brain for plasticity and learning.
Session D
July 6 - August 14

Psychology 4
Emotional Intelligence

Class Number 12746

TU, TH 1:00 - 3:29 pm
Prof. Davina Chan
Synchronous - Time Conflict
Enrollment NOT Allowed

This course will examine research on emotional intelligence and techniques for developing emotional intelligence. We will discuss various components of emotional intelligence, including the ability to identify and manage one's emotions, successfully motivate oneself to achieve one's goals, read other people's emotions accurately, and use emotions to navigate social relationships effectively. Material will be taken from social psychology, clinical psychology, and cognitive neuroscience.
This course is designed to address topics related to stress and coping. In particular, we will cover the biological, social, personality, cognitive, and clinical factors that play a role in the development of stress and subsequent coping techniques that can be used to deal with stress. The class will have a strong focus on the empirical findings relating to the subject.
Psychology 136
Human Sexuality
Class Number 12431

TU, TH 1:30 - 5:29 pm
Prof. James Mchale
Synchronous - Time Conflict
Enrollment NOT Allowed

Biological, social, and clinical issues in sexuality. Topics include psychology and physiology of sexual response, new developments in contraception, homosexuality and lesbianism, variations in sexual behavior, gender identity and role, definition and treatment of sexual dysfunction. Approved for state psychology licensing requirement.
This course is for students who are curious about clinical psychology and who seek to explore real world cases and examples of mental health diagnoses. Through the use of clinical cases and first-person accounts, this course will give an overview of the diagnostic criteria mental health providers use to make diagnoses, and analyze environmental and other causal factors, with a view to possible treatment options for various mental disorders.
The course will review research on culture, race, and ethnicity and will consider the implications of these findings for our understanding of race, culture, and ethnicity in American society. Students will gain a better appreciation of the ways that cultural traditions and social practices regulate and transform psychological functioning. Simply, the course is about how culture affects psyche and how psyche affects culture.
Psychology N180
Industrial-Organizational Psychology

Class Number 12435
M, W, F 9:00 - 11:29 am
Prof. Christian Wright
Asynchronous - Time Conflict
Enrollment Allowed

Session E
July 27 - August 14

Psychology 137
Mind-Body and Health

Class Number 12626

M, TU, W, TH, F 9:00 am - 11:59 am
Prof. Ephrem Fernandez
Asynchronous - Time Conflict
Enrollment Allowed

Course explores psychosomatics or mind-body interactions in a dozen diseases/disorders from recurrent ailments and chronic diseases to “terminal” diseases. Symptoms are outlined, epidemiological data are used to illustrate socio-cultural underpinnings of health, and etiology examines how emotion, personality, and other psychological variables interact with the biological.
Global mental health seeks to alleviate suffering caused by mental disorders globally. Although most of the world lives in low-and-middle income countries, the majority of mental health resources are concentrated in high-income countries. Therefore, we focus on the mental health burden in low-resource settings. Through primary articles and recent chapters, this course integrates the scientific evidence, cultural and contextual nuances, and interdisciplinary approaches of global mental health
