Title: Tech Time: Revamping Your Life with Technology, 1 Unit

Schedule: Tuesdays and Thursdays 5:00pm – 6:00pm

Facilitator: Chanan Walia & Katie Willett

Course Description:

This course aims to teach students about how technology can be used to make their lives more efficient and to make students comfortable and confident in their use of technology. We will provide students with a plethora of tools and skills they can use and develop that will let them use technology most effectively. For example, students will learn how to build interactive presentations, find apps and services for any problem, organize and store files efficiently, use apps to improve productivity, use advanced features of office tools, collaborate and communicate online, and improve their overall understanding and appreciation of and for technology.
